(Continued on the reverse side)

- The following screens may appear after the installation is completed.
  - (Screen 5) Restart the personal computer according (Screen 6) to the instruction on the screen.

Select "This program installed correctly". Do not choose "Reinstall using recommended settings", because the installer installs an incorrect module.

Restarting Windows	Program Compatibility Assistant
Setup has finished copying files to your computer. Before you can use the program, you must restart Windows or your computer. Choose one of the following options and click DK to finish setup.	This program might not have installed correctly If this program didn't install correctly, try reinstalling using settings that are compatible with this version of Windows. Program: Setup Launcher Publisher, InstallShield Software Corporation Location: F\EnvMEL\SETUP.EXE
Yes, I want to restart my computer now     No, I will restart my computer later.	<ul> <li>Reinstall using recommended settings</li> <li>This program installed correctly</li> <li>Cancel</li> </ul>
UK	What settings are applied?

- (2) Uninstallation procedure
  - 1. Uninstall the product from the control panel of Windows<sup>®</sup>.
- Uninstalling deletes all the settings within "Communication Setup Utility". To avoid this, export the file storing the settings.
- If the right screen appears during the uninstall procedure, click the "No to All" button.

Remove Shared	File?		
The system indicates that the following shared file is no longer used by any programs. If any programs are still using this file and it is removed, those programs may not function. Are you sure you want to remove the shared file?			
Leaving this file will not harm your system. If you are not sure what to do, it is suggested that you choose to not remove this shared component.
