

Mitsubishi Electric and Shanghai Mitsubishi Elevator: “Luxurious yet Best-in-Quality Products” Named to Serve Prestigious Hotels and Offices in Dalian, China

Shanghai Mitsubishi Elevator Co. Ltd., a joint venture company of Mitsubishi Electric Corp. set up in Shanghai to sell and provide services for elevators, escalators and moving walks, has been awarded a contract by Dalian Wanda Group Corp. Ltd., one of China’s leading property developers, to deliver a total of 50 elevators and escalators to the Dalian Wanda Center, a first-class twin-towered property to be located in Dalian’s Donggang District, a prime waterfront redevelopment in the City of Dalian, northeast China.

The Dalian Wanda Center is the very first large-scale project after the redevelopment of the District has been initiated, and will have a North Tower and South tower: the former (36 floors above ground) will incorporate two prestigious hotels, the six-star Conrad Wanda Hotel and the five-star Hilton Wanda hotel, in the upper and lower floors respectively; the latter (44 floors above ground) will provide luxurious office spaces. Furthermore, there will be a sophisticated podium to serve as convention and banquet halls. Dalian Wanda Group was seeking a reliable, high-grade vertical transportation system to enhance the hotel-guest experience and ensure a comfortable working environment for its office tenants.

The Dalian Wanda Group selected Mitsubishi Electric’s high speed elevators, and Shanghai Mitsubishi Elevator’s low and middle speed elevators and escalators for the Dalian Wanda Center, because these companies’ products which are in service in many Chinese cities are recognized by building owners and users. The exceptional riding quality of Mitsubishi Electric’s high-speed elevators series NexWay and GPM-III will best match the sophistication of this project: precise control by Mitsubishi Electric’s PM traction motor minimizes the vibration and noise during acceleration, deceleration and running at rated speeds. The green features of these high-speed elevators were a big factor too: the combination of VVVF inverter and PWM (pulse width modulation) converter regenerates the electric power created from braking energy which can be utilized for building facilities such as air conditioning and lighting, and the latest group control system, Σ AI-2200C, reduces power consumption without affecting the passenger waiting times significantly. In addition, Shanghai Mitsubishi Elevator was selected for its customer-oriented, best-of-market quality service, as “prompt yet reliable” service is essential for the success of the Dalian Wanda Center’s luxury hotels and offices.

Shanghai Mitsubishi Elevator has been awarded several prestigious projects by Dalian Wanda Group, including the six-star Sofitel Wanda Beijing Hotel in CBD (Central Business District) of Beijing, and the five-star Le Meridien Qingdao Hotel in Shandong province. The latest project, awarded at the end of last year, is the luxurious three-towered office building complex to be located at Wanda Plaza in the financial district of Fuzhou city, to which Shanghai Mitsubishi Elevator will be delivering a total of 29 units, including 7 sets of NexWay.

The Dalian Wanda Center, when opened in June 2011, will provide its hotel guests and office workers with the means of *luxurious yet best-in-quality transportation*. Mitsubishi Electric Corporation and Shanghai Mitsubishi Elevator remain committed to the highest quality and utmost customer satisfaction, and to providing yet more ‘green’ products and services.

Manufacture	Model	Q'ty	Capacity & Speed
Mitsubishi Electric, Japan	NexWay	13	1050kg, 1600kg, 3.0m/s, 3.5m/s
	GPM-III	11	1600kg, 4.0m/s
	ELENESSA	2	1050kg, 1.0m/s
	NexWay-S	4	1050kg, 1350kg, 1.0m/s, 1.6m/s
Shanghai Mitsubishi Elevator, China	ELENESSA	11	1050kg, 1275kg, 1600kg, 1.0m/s
