

Mitsubishi Electric Starts Elevators and Escalators Business in Romania

Mitsubishi Electric Corporation and Mitsubishi Corporation recently started its business of elevators and escalators in Romania through the sales channel of ELMAS S.R.L.. Romania is the first country in Eastern European market for Mitsubishi to supply its elevators and escalators.

ELMAS was established in 1990 with integral private Romanian capital and has four business units including elevators and escalators. ELMAS primarily has excellent reputation in Romanian market through its optimal solutions for the customers.

Mitsubishi Electric Corp. utilizes cutting edge technologies with years of dedicated research and development, and its Machine-Room-Less product “ELENESSE” is well known in global markets. Mitsubishi's advanced technologies bring not only leading levels of safety and comfort, but also greater energy saving with “Regenerative Converter” and “Variable Traveling Speed System”.

Utilizing a broad network of Mitsubishi Corporation, Japanese largest trading company, which has more than 100 branches worldwide including Romania, ELMAS and Mitsubishi will expand its business operation in Romanian market.

ELMAS and Mitsubishi are united together with common business policy, which is to provide high quality products as well as services, to enhance the customer satisfaction in Romanian market.
