

Everywhere — even in Ushuaia,  
the world's southernmost city,  
Mitsubishi Electric Elevators

## Exploring Mitsubishi Elevators & Escalators Around the World

Vol. **7**

Elevators providing Arakur Ushuaia Resort & Spa guests with Mitsubishi Electric's trademark comfort and breathtaking views of the "End of the World" (Ushuaia, Argentine Republic)

At the southern tip of Argentina about 3,200km south of Buenos Aires is the island of Tierra del Fuego. On the southern coast, bordered to the north by snowcapped mountains, is Ushuaia, the southernmost city in the world. Also called the "End of the World," this port city is the embarkation point for popular cruises to the white wilderness of Antarctica, attracting tourists from around the world. Extending along a natural balcony 250m above sea level, Arakur Ushuaia Resort & Spa boasts panoramic views of the city. At this spa resort surrounded by spectacular scenery, eight Mitsubishi Electric elevators are on duty 24/7. An impressive list of elevator customers in Buenos Aires, the quality and precision of installation work, and above all, an acclaimed record of maintenance response made Mitsubishi Electric elevators a compelling choice for the hotel. Every month, highly trained engineers travel to Ushuaia to perform regular maintenance while local staff are ready to instantly respond to any emergency. Today, Mitsubishi Electric literally goes to the end of the world to deliver quality in motion.
