Table of Contents

Chapter 1 Product Outlines
1.1 Applications and Features
1.2 Products Line-up
1.3 Structure and Functions
   1.3.1 Module Structure
   1.3.2 Internal Circuit Topology
   1.3.3 Built-in Functions

Chapter 2 Electric Characteristics
2.1 Static Characteristics
2.2 Switching Characteristics
2.3 Recommended Operation Conditions
2.4 Waveforms of Input Current/Voltage and Current Harmonic

Chapter 3 Package
3.1 Package Outlines Drawing
3.2 Laser Marking
3.3 Description of Input and output Terminals
3.4 Function Description
3.5 Installation Guidelines
3.6 Temperature Measurement of DIP-PFC case and Heat Sink

Chapter 4 System Applications
4.1 System Connections
4.2 Recommended System Composition
4.3 DIP-PFC Wiring Guidelines
4.4 DIP-PFC Operation Sequence
4.5 Start-up and Stop Operation Sequence of AC Supply, Control Supply Control Signal
4.6 Noise Withstand Capability

Chapter 5 Additional Guidelines
5.1 Packaging Specifications
5.2 Attention s for Handling

Appendix Control IC of DIP-PFC
A.1 About M81012FP
A.2 About M63914FP
A.3 Protective Functions
A.4 Fault Output Condition and Its Timing
A.5 Example of Interface Design
