

CHILLERS

High performing range with efficiency and reduced energy consumption dedicated by inverter technology.

AIR HANDLING UNITS

Tailored for specific facilities such as hospitals, food industries and other industrial applications requires precise and safe air control.

Mitsubishi Electric's applied air conditioning systems for various applications

IT COOLING SYSTEMS

Specialized cooling systems for various conditions, adjusting sensitive equipment such as data center.

ROOFTOP UNITS

Suitably designed with thermo-hygrometric operation, air freshening and filtration in medium-large surface and volume ambient.
