Never stop making changes (Part 2)

Thoughts behind my Purpose

I suggested we should build canteens last year, which materialized in the shape of "4F 4rest" in our Tokyo head office, thanks to the effort of all involved. I appreciate it.

I hope that everyone at all factories, business sites, branches, and sales companies are feeling the waves of changes in their respective workplaces.

As the Part 2 of the "Never Stop Making Changes" campaign, I would like to drive an initiative to create a culture, in which every one of the Mitsubishi Electric Group employees is happy to recommend others to work for this company or the Group. In the last few years, I have been directly involved in student internship programs. I was so happy to hear the students say "What a wonderful company Mitsubishi Electric is!" during their work experiences with us. Those students are now working as Mitsubishi Electric employees. I am very grateful.

We may be unhappy with something at work. However, let's not blame others or the person who is causing the problem. We have to be able to think individually, change things and solve problems. To that end, let's drive our reforms further! Would you recommend your friends and acquaintances to work for this company or the Group?

To have all of you to answer "Yes", I will continue to promote our reforms this year together with you.

Please refer to here for more details.
