

## **MITSUBISHI TO SUPPLY PORTA FIRAL IN BARCELONA**

Mitsubishi has been awarded a contract of lifts for an office high-rise building “Porta Firal Tower3” developed and constructed by Iberdrola Inmobiliaria in Zona ranca de Barcelona, Spain. Mitsubishi Electric will supply 9 units of elevators through its authorized distributor FAIN Ascensores in Spain. The six of them are its high-speed model *NexWay* equipped with Mitsubishi’s state-of-the-art group controls coupled with “Destination Oriented Prediction System”. This is particularly beneficial to improve the traffic flow, especially in buildings with heavy up-peak traffic.

Mitsubishi elevators will become a leading brand of efficient vertical transportation in this new development area with Porta Firal as one of impressive landmarks in the world-renowned city.

The collaboration of Mitsubishi Electric Corporation and FAIN is reputable for their equipment, installation and maintenance works, proven by monumental projects in Spain.
