Mitsubishi Electric Named to CDP Supplier Engagement Assessment Leaderboard

Sixth consecutive selection and ninth overall for climate-change collaboration with suppliers

TOKYO, May 21, 2026 – [Mitsubishi Electric Corporation](https://www.mitsubishielectric.com) (TOKYO: 6503) announced today that its environmental efforts related to supply chains have earned a 2025 “Supplier Engagement Assessment A score,” the highest ranking in the Supplier Engagement Assessment program operated by [CDP](https://www.cdp.com/), an international non-profit organization that supports environmental disclosure. Since 2020, this is the sixth consecutive year and ninth time overall in which Mitsubishi Electric has earned a top ranking for excellent actions and strategies to reduce greenhouse gas emissions and climate-change risks throughout its supply chain.

The Supplier Engagement Assessment evaluates how effectively companies work with their suppliers to address climate change. Companies that receive top appraisals are named in the “Supplier Engagement Assessment A List.”

Mitsubishi Electric, which has positioned sustainability as a cornerstone of its business, management philosophy and the company’s [Environmental Sustainability Vision 2050](https://www.mitsubishielectric.com/en/sustainability/Environmental%20Sustainability%20Vision%202050), aims to achieve net-zero greenhouse gas (GHG) emissions at its factories and offices by the fiscal year ending March 31, 2031 and throughout its entire value chain by the fiscal year ending March 31, 2051.

Mitsubishi Electric, in cooperation with its suppliers across diverse business fields, will continue to contribute to the realization of a sustainable global environment throughout its global value chains, energy-saving products and systems, and cutting-edge infrastructure.

About CDP

CDP evaluates environmental initiatives of corporations and governments with the endorsement of more than 640 investors managing worldwide funds totaling USD 127 trillion. After distributing questionnaires on activities that impact Climate Change, Water Security, and Forests, CDP then evaluates the data and announces the results. The latest evaluation, which includes eight ranks from A to D-, received responses from more than 22,100 companies, of which approximately 4% received the top A rank. In this evaluation, Mitsubishi Electric has also been recognized as an “A List” company for its Climate Change and Water Security activities, respectively.¹ In 2025, only 0.6%² secured an A-list rating for both Climate Change and Water Security activities.

The Supplier Engagement Assessment program uses a company’s existing response to the CDP Climate Change questionnaire to assess selected questions of 4 items on governance, targets, scope 3 emissions, and value chain engagement.
