**Mitsubishi Electric Acquires HVAC Sales, Installation and Maintenance
Companies of APAC and COMPAC Groups in Netherlands**

Expanding installation and maintenance strengths in Europe's data center cooling systems market

TOKYO, July 14, 2026 – [Mitsubishi Electric Corporation](https://www.mitsubishielectric.com/en/pr/) (TOKYO: 6503) announced today that its wholly owned subsidiary Mitsubishi Electric Hydronics & IT Cooling Systems S.p.A. acquired all shares of the APAC group and the COMPAC group including their operating companies involved in HVAC sales, installation and maintenance on July 13. Both groups were headquartered in Utrecht Province in the Netherlands.

The acquisition strengthens Mitsubishi Electric's one-stop capabilities in Europe by enhancing its ability to provide integrated equipment sales, installation and maintenance services. By combining the installation and maintenance expertise of the APAC and COMPAC groups with its own extensive product portfolio, Mitsubishi Electric expects to expand its data center cooling systems business across Europe.

Global demand for data center cooling systems has increased significantly in recent years, and Mitsubishi Electric has positioned this sector as one of its key growth businesses. In Europe, data center development is expanding beyond the traditional hubs of Frankfurt, London, Amsterdam, Paris and Dublin into both northern and southern regions, creating growing demand for advanced cooling solutions. At the same time, data center operators are increasingly seeking comprehensive service providers that can deliver not only equipment and installation but also maintenance and ongoing support to ensure stable and reliable performance.

To address these market needs, Mitsubishi Electric acquired the APAC group, which has extensive experience designing, selling, installing and maintaining data center server room cooling systems, as well as the COMPAC group, which provides sales, installation and maintenance for applied HVAC systems¹ in factories, offices and commercial facilities.

Going forward, Mitsubishi Electric will leverage the combined strengths of the APAC and COMPAC groups to grow its business in the European data center cooling systems market. Mitsubishi Electric also plans to

¹ Industrial and other large-scale air conditioning systems custom-designed to meet specific customer requirements.

broaden its portfolio of data center solutions to include utility infrastructure, such as power systems, facility monitoring and security systems, to deliver comprehensive solutions that meet the evolving needs of data center operators.

About APAC group

Companies	- APAC Airconditioning B.V. - APAC Service B.V. - APAC-Raised Floors B.V.
Location	Utrecht Province, the Netherlands
Established	1987
Employees	55 (as of May 31, 2026)
