

## Japan MOE Guideline

Item to Be Reported	Reference Page (s)	Contents
<b>1. Basic information of environmental reporting</b>		
<b>1. Basic requirements for environmental reporting</b>		
Boundary of the reporting entity	P.1	About This Report
Reporting period for information provided	P.1	About This Report
Reporting standards, guidelines or the like	P.1	About This Report
Overview of the environmental report	—	—
<b>2. Trends in key performance indicators</b>		
Trends in major performance indicators	P.39-43	Environmental Data
<b>2. Items to be reported in environmental reporting</b>		
<b>1. Top management's commitments</b>		
Top management's commitments on the entity's response to material environmental issues	P.2-3	From the President
<b>2. Governance</b>		
The entity's governance structure	P.11	Management System
Name of the manager responsible for material environmental issues	P.11	Management System
The roles of the board of directors and the board of executive officers in the management of material environmental issues	P.11	Management System
<b>3. Stakeholder engagement</b>		
Corporate policies to stakeholders	—	—
Overview of stakeholder engagement activities conducted in the reporting period	—	—
<b>4. Risk management</b>		
Environment-related risk identification, assessment, and management processes	P.11	Management System
	P.16	Evaluation of the Importance of Environmental Issues in Business
Positioning of the above processes within the entity's overall risk management	—	—
<b>5. Business model</b>		
The entity's business model	—	—
<b>6. Value chain management</b>		
Value chain overview	P.17	Overview of Environmental Consideration and Progress of the 9th Environmental Plan
Green procurement policy, objectives, and results	P.18	Environmental Considerations for Procurement
	P.21	Environmental Considerations Through the Lifecycle of Products
Status of eco-friendly products and services	P.19-20	Contribution to Reducing CO <sub>2</sub> from Product Usage
<b>7. Long-term vision</b>		
Long-term vision	P.5-6	Environmental Sustainability Vision 2050
Time period covered by the long-term vision	P.5-6	Environmental Sustainability Vision 2050
Reasons why that time period was selected	—	—
<b>8. Strategy</b>		
Business strategy of an entity developed for contributing to the achievement of a sustainable society	P.5-6	Environmental Sustainability Vision 2050
<b>9. Methodology for identifying material environmental issues</b>		
Procedure by which the entity identified its material environmental issues	P.16	Evaluation of the Importance of Environmental Issues in Business
List of identified material environmental issues	P.16	Evaluation of the Importance of Environmental Issues in Business
Reasons that the identified environmental issues were judged material	P.16	Evaluation of the Importance of Environmental Issues in Business
Boundaries of the material environmental issues	—	—
<b>10. The entity's material environmental issues</b>		
	P.7	Mitsubishi Electric Group Environmental Policy
Policies and/or action plans	P.17	Overview of Environmental Consideration and Progress of the 9th Environmental Plan
	P.28	Mitsubishi Electric Group Biodiversity Preservation Activities
Targets and results of policies / action plans based on performance indicators	P.17	Overview of Environmental Consideration and Progress of the 9th Environmental Plan
	P.22	Reducing CO <sub>2</sub> from Production
	P.19-20	Contribution to Reducing CO <sub>2</sub> from Product Usage
	P.25-26	Using Water Effectively
Methodologies used for calculating each performance indicator	P.1	About This Report
Aggregation scope of data for each performance indicator	—	—
Financial impact of related risks and opportunities and calculation methodology thereof, if the financial impact is significant	—	—
An assurance report, if an independent third party provided assurance to the items to be reported	P.42	Verification Statement

Item to Be Reported	Reference Page (s)	Contents
<b>Reference: Major environmental issues and their performance indicators</b>		
<b>1. Climate change</b>		
<b>Greenhouse gas emissions</b>		
Scope 1 emissions	P.41	Reducing Greenhouse Gases Emitted in the Value Chain
Scope 2 emissions	P.41	Reducing Greenhouse Gases Emitted in the Value Chain
Scope 3 emissions	P.41	Reducing Greenhouse Gases Emitted in the Value Chain
<b>Emission intensity</b>		
Greenhouse gas emission intensity	—	—
<b>Energy usage</b>		
Breakdown of energy usage and overall energy usage	P.39-40	Material Balance
Renewable energy usage as a percentage of overall energy usage	P.39-40	Material Balance
<b>2. Water resources</b>		
	P.25-26	Using Water Effectively
Water resource inputs	P.39-40	Material Balance
	P.41	Amount of Water Intake/Drainage/Reuse
Water intensity	P.25-26	Using Water Effectively
	P.41	Amount of Water Intake/Drainage/Reuse
	P.25-26	Using Water Effectively
Water discharge	P.39-40	Material Balance
	P.41	Amount of Water Intake/Drainage/Reuse
Status of water stress, if the entity has sites or supply chains located in areas with water stress	—	—
<b>3. Biodiversity</b>		
Impact of business activities on biodiversity	P.28-29	Mitsubishi Electric Group Biodiversity Preservation Activities
Status and extent of the dependency of the entity's business activities on biodiversity	P.28-29	Mitsubishi Electric Group Biodiversity Preservation Activities
	P.28-29	Mitsubishi Electric Group Biodiversity Preservation Activities
Business activities that contribute to biodiversity conservation	P.29-30	Biodiversity Preservation Measures at Business Sites
Status of cooperation with external stakeholders	—	—
<b>4. Resource circulation</b>		
<b>Resource inputs</b>		
Volume of nonrenewable resource inputs	—	—
Volume of renewable resource inputs	—	—
	P.25-26	Using Water Effectively
Volume of recycled materials used	P.41	Amount of Water Intake/Drainage/Reuse
	P.25-26	Using Water Effectively
Rate of recycled and reused resources (= Volume of recycled materials used / Volume of resource inputs)	P.41	Amount of Water Intake/Drainage/Reuse
<b>Resource waste</b>		
Total production of waste, etc.	P.24	Effective Utilization of Resources
	P.39-40	Material Balance
Total final disposal volume of waste, etc.	P.24	Effective Utilization of Resources
	P.39-40	Material Balance
<b>5. Chemical substances</b>		
<b>Volume of chemical substances in storage</b>		
	P.27	Managing Chemical Substances
Volume of chemical substance emissions	P.39-40	Material Balance
	P.27	Managing Chemical Substances
Volume of chemical substances transferred	P.39-40	Material Balance
	P.27	Managing Chemical Substances
Volume of chemical substances handled (volume used)	P.39-40	Material Balance
<b>6. Pollution prevention</b>		
<b>General</b>		
Status of legal compliance	P.15	Preventing Environmental Incidents
<b>Air quality conservation</b>		
Air-pollutant emissions volume, emission concentration in air pollution regulations	P.39-40	Material Balance
<b>Water pollution</b>		
Water pollution load, emission concentration in emissions regulations	P.39-40	Material Balance
<b>Soil pollution</b>		
Status of soil pollution	P.15	Preventing Environmental Incidents
