Mitsubishi Electric Group
Sustainability Report 2020

Highlights Edition

Streamlined and better quality work
Increased communication in workplaces
Enhanced work and life
Editorial Policy

Aiming to contribute to a more sustainable society, the Mitsubishi Electric Group renamed the “CSR Report” to the “Sustainability Report” in fiscal 2021.

This “Highlights Edition” of the Sustainability Report 2020 was created with the aim of communicating with stakeholders regarding the Mitsubishi Electric Group's sustainability and CSR efforts to realize a sustainable society. In addition to communicating the overall picture of CSR at the Mitsubishi Electric Group, we introduce our basic aspects of CSR materiality we identified in FY 2015. We endeavor to fulfill our responsibility of presenting information to the public in order to broaden our range of communication with stakeholders.

We appreciate any and all frank and honest feedback intended to further improve the report.

Period Covered by the Report
April 1, 2019 – March 31, 2020

(next planned publication : September 2021)

* Also includes some information on policies, targets, and plans for fiscal 2021 and thereafter.

Reporting Medium
Non-financial information about the Mitsubishi Electric Group is disclosed in the section of the Sustainability website and “Sustainability Report”, and environmental information is introduced in detail in the environment section of the website and “Environmental Report”. The “Sustainability Report” is available on our website together with the “Sustainability Report Highlights Edition” aimed at communicating with stakeholders.

Corporate Strategy

The Mitsubishi Electric Group will provide integrated solutions to address diversifying social challenges, in the four fields of Life, Industry, Infrastructure and Mobility, uniting all the capabilities inside and outside of the Group. For this purpose, we will enhance our business foundation fostered over the past 100 years* and further transform business models.

*Business foundation fostered over the past 100 years: connection with customers, technologies, personnel, products, corporate culture, etc.

Based on its strategy, Mitsubishi Electric Group will pursue value creation for addressing social challenges, and contribute to achieving the 17 goals of the SDGs*, through all corporate activities.

*SDGs: “Sustainable Development Goals” adopted by the United Nations as goals to achieve towards 2030

Further promote initiatives to create value, such as simultaneous achievement of “sustainable society,“ and “safety, security, and comfort.”

Mitsubishi Electric Corporation

Tokyo Building, 2-7-3, Marunouchi, Chiyoda-ku, Tokyo 100-8310, Japan

President & CEO : Takeshi Sugiyama

Phone : +81 (3) 3218-2111

Established : January 15, 1921

Paid-in Capital : ¥175,820 million

Shares Issued : 2,147,201,551 shares

Consolidated Revenue : ¥4,462,509 million

Consolidated Total Assets : ¥4,409,771 million

Employees : 146,518
Mitsubishi Electric Response to Novel Coronavirus (COVID-19)

1. Work arrangements

For business tasks that can be performed from home without a problem, staff are working from home. For work that is best performed in the office, Mitsubishi Electric is implementing thorough infection prevention measures to support staff who come into the office.

We will continue to promote the use of telework and online meetings as flexible and efficient work methods.

2. Infection prevention measures

Given concerns about the spread of COVID-19, the company is placing its highest priority on employees’ safety and health. In each workplace, we are working to maintain and strengthen infection prevention measures such as cleaning and disinfection, promotion of staggered work hours, and measures to ensure physical distancing.

3. Information sharing

The latest news regarding Mitsubishi Electric’s response to the COVID-19 pandemic is shared on this website.

4. New lifestyles and business styles

The attitudes of people worldwide are expected to change significantly due to the measures taken to prevent the spread of COVID-19. While incorporating these evolving values into our work styles and business methods, we will do our best to respond to changing public expectations and help solve social issues.

Mitsubishi Electric Group Sustainability Report 2020
Mitsubishi Electric's Business Segments

### Building Systems
Providing safe and smooth vertical movement and building systems solutions that are environmentally friendly, secure, comfortable, and efficient

- Elevators
- Escalators
- Building management systems
- Building security systems

### Factory Automation Systems
Underpinning global manufacturing by providing value-added products, solutions and services

- Edge and Programmable Logic Controllers (PLCs)
- Servo systems
- Industrial and collaborative robots
- Circuit breakers
- Energy-saving support systems
- NC controllers
- Laser processing machines
- 3D (Metal) printers

### Public Systems
Supporting a better tomorrow with cutting edge technologies at work in our everyday life

- Water treatment technologies
- Aircraft management systems
- Large screen video systems
- Disaster information systems

### Energy Systems
Building power infrastructure across the entire energy value chain as one of Japan's foremost power system suppliers

- Turbine generators
- Protection and control systems
- Vacuum breakers
- Transformers
- Substation systems
- Grid stabilization systems
- Switchgears
- Battery energy storage control systems
- Power conversion systems
- Applied Superconductor products
- Power ICT solutions

### Transportation Systems
Mitsubishi Electric as a leader in railway solutions providing a full range of equipment and systems for rolling stock

- Propulsion systems
- Air conditioning systems for rolling stock
- Rolling stock information management systems
- Electricity control systems
- Train vision
- Transportation planning and control systems

### Automotive Equipment
Contributing to the advancements in motorization with a broad lineup of products

- Charging & Starting products
- Electric power steering system products
- Engine management products
- Car multimedia products
- ADAS products
- Electrification components
Cutting edge technologies at work across the vast business fields in the space industry

We have participated in the development of more than 500 satellites in various countries around the world. We are able to conduct all aspects of satellite development in-house, including design, production, and testing using our test facilities that can reproduce the environment in space. We are also a world leader in large telescopes, too, having been involved with the Subaru Telescope in Hawaii and the ALMA Telescope in Chile.

Making communications easier and more convenient with technologies that "send" information

We supply products for optical communication systems that enable high-speed transfers of content-rich data, such as HD videos, over the Internet using existing communications infrastructure. Through this business line, we are helping to make society a better place with an assortment of solutions, including video surveillance systems that make society safer and more secure as well as wireless communication systems for smart meters that optimize energy usage.

Providing key devices underpinning a more affluent society, harnessing cutting edge technologies

We supply semiconductors and devices that make our lives more affluent as key devices in equipment used in a wide range of fields, from home electronics to space. In particular, power semiconductors devices are used in a truly wide range of fields, including home products, industrial equipment, electric vehicles, power control systems for traction, motor control systems, wind turbines, and photovoltaic systems. The performance of our products helps to lower energy usage in each of these fields, too.

Providing comfortable and energy-efficient air conditioning for industry and in our everyday life

We provide not only in Japan but around the world with a broad range of highly-energy efficient air conditioning systems created with comfortable indoor environments in mind, from the Kirigamine brand of room air conditioners to air conditioner systems for stores, offices and other buildings. At the same time, we also supply a number of low-temperature products and systems for use in areas from distribution to industry, including cool warehouses and cold storage, as well as ice makers, dehumidifiers and other equipment for warehouses, food processing plants and ice skating rinks.

President's Message

Pursue Sustainable Growth by Contributing to Resolving Increasingly Diverse Social challenges

Meeting the expectations of a global society

I would like to express my deepest sympathy and condolences for all the people who have lost their lives to COVID-19, as well as for everyone who has suffered through the pandemic and their families and acquaintances. In addition, I would like to express my sincere gratitude and respect to everyone working on the front lines of the medical field and other fields to prevent the spread of disease and treat patients.

The Mitsubishi Electric Group gives the highest priority to the safety and health of customers, business partners, and other related parties, as well as employees and their families. Having taken adequate measures to prevent the spread of infection, such as thorough enforcement of remote work, and securing social distance in production, construction and service related departments, we will continue business that are necessary for fulfilling our responsibilities to society as a corporation in order to maintain people’s lives, provide a stable supply of products, provide services, and support our customers.

The Mitsubishi Electric Group will celebrate its 100th anniversary in fiscal 2021. Since our foundation in 1921, we, the Mitsubishi Electric Group, have grown, contributing to society by offering products and services that meet the needs of the time.

Today’s society is different; the pace of change continues to accelerate and social issues, such as climate change, depletion of resources, regional disparities, poverty, labor, and human rights, are coming to the forefront. We must aim to become a corporate group that can contribute to resolving such challenges by leveraging our strengths in technology, personnel, and products developed through experience in the history of 100 years.

Today, the development of companies requires both social contribution and corporate growth simultaneously, instead of only seeking their profits. In order to fulfill its responsibilities as a globally operating corporate citizen, the Mitsubishi Electric Group signed the UN Global Compact in 2018 to conduct corporate activities that align with the 10 principles in the 4 key areas of human rights, labor, environment, and anti-corruption.

In addition, since the formulation of the globally standardized goals called the Sustainable Development Goals (SDGs)*, we feel that the relationship between corporate management and social issues is getting closer every year. The Mitsubishi Electric Group will contribute to meeting the 17 SDGs through all its corporate activities by taking advantage of the strengths of an integrated electronics and electrical manufacturer.

Furthermore, we take various matters related to our CSR materiality found in fiscal 2020 seriously and will work in earnest to prevent the same problems from recurring, fulfilling the roles of a company that is responsible for the global society.

* The Sustainable Development Goals (SDGs) comprise a set of targets adopted by the U.N. General Assembly in 2015 as part of an action plan to be accomplished by 2030 that would end poverty, protect the planet and ensure prosperity for all.

Manage a Business with Focus on Resolving Social Challenges

In 2019, the Mitsubishi Electric Group announced that it will pursue value creation to resolve social issues based on the corporate strategy.

In formulating the strategy, our directors confirmed in many discussions that the Group should aim to become a corporation that resolves social issues through its business activities.
We have defined the four fields of Life, Industry, Infrastructure and Mobility in diversifying social challenges that the Mitsubishi Electric Group can contribute to. While enhancing the business foundation fostered over the past 100 years, we will also unite all the capabilities inside and outside of the Group to offer a total solution in the four fields through a transformation of business models.

In order to build new business models and accelerate the creation and development of new businesses, which are difficult under the existing framework, we established the Business Innovation Group in April 2020. With a mission to demonstrate the synergy of the Mitsubishi Electric Group’s wide range of businesses, “From the Home to the Outer Space,” and to develop by itself businesses in new areas based on that foundation, the Business Innovation Group will contribute to society by creating new value.

Even for an integrated electronics and electrical manufacturer, however, there are not few issues that can be addressed only by the Mitsubishi Electric Group. We will proactively leverage open innovation initiatives with research institutions and startups having profound knowledge to promote business.

**Consistently promoting the four CSR materiality**

We will continue to focus our efforts to the Mitsubishi Electric Group’s four CSR materiality: “Realize a sustainable society,” “Provide safety, security, and comfort,” “Respect human rights and promote the active participation of diverse human resources,” and “Strengthen corporate governance and compliance on a continuous basis.”

In response to environmental issues, we have developed “Environmental Sustainability Vision 2050”*1 for 2050 and will promote a long-term approach. In addition to expressing approval of the recommendations by the TCFD*2 (Task Force on Climate-related Financial Disclosures) in 2019 as it emphasizes activities and information disclosure in line with international norms, the Group also has obtained certification from the SBT (Science Based Targets) initiative*3 in January 2020.

However, we have caused various incidents related to CSR materiality in fiscal 2020. One of such incidents is work-related issues that affected employees’ lives or mental and physical health. The entire Group will be fully committed to achieving a workplace environment where all employees can maintain their physical and mental health and work actively with a sense of security to prevent the same incident from recurring. We have also caused a great inconvenience and anxiety to our stakeholders as a result of a quality control issue in which products that do not satisfy the agreement with customers were shipped as well as an illegal access issue related to information security. We also take the problem of a delay in reporting to customers and agencies concerned seriously. Our outside directors have given us much advice on these incidents and the entire Group will commit to prevent these problems from recurring.

---

*1 Jun 13, 2019 Mitsubishi Electric Unveils its Group’s Environmental Sustainability Vision 2050
*2 TCFD (Task Force on Climate-related Financial Disclosures): A task force for disclosure of climate-related financial information led by the private sector, established at the request of the G20 finance ministers and governors of central banks
*3 SBT (Science Based Targets) initiative: An international initiative by the UN Global Compact (UNGC), the World Wide Fund For Nature (WWF), the CDP, and the World Resources Institute (WRI)

**Continue challenging to create value**

Going forward, we must disclose appropriate information in a timely manner to our stakeholders. In addition to the results of our efforts, we will especially proactively communicate the process of making such efforts, including the Mitsubishi Electric Group’s view and recognition of issues. As a result, we believe the point of contact with various stakeholders will increase, leading to increased possibilities for creating new value together.

It is also important to clearly present company policies and company-wide activities from the perspective of communication with employees. Since I was appointed as the president, I have visited many sites and held “President’s Forum” to talk with employees, in which I directly communicate the company policies and gather opinions from a wide range of frontline staff. At the Mitsubishi Electric Group, our employees have had opportunities to discuss with each other through small-group activities and other opportunities. By taking advantage of such a corporate culture to accept differences with each other and think about what we should be like, we believe our workplaces will be united to show our strengths.

Fiscal 2021 marks Mitsubishi Electric’s 100th anniversary. In order to support new values in society and also to realize a society that people desire, I believe the Mitsubishi Electric Group should use its full strength to contribute to resolving social issues. Meanwhile, I send a message to our employees with the hope that they will have a desire to tackle social issues at work based on their horizons broadened by regularly involving community, volunteer, or other activities and to continue their pursuit of searching for a better tomorrow.

Nonetheless, we expect that measures to prevent the spread of the COVID-19 will bring dramatic changes to the values of humanity, including lifestyles, work styles, business styles, and communication methods. We will incorporate new values into our own working styles, while unifying all the capabilities inside and outside of the Group, in order to respond to changing demand and to address social challenges.

T. Sugiyama
President & CEO

---

Time of interview: Spring 2020
Interviewer: Ayako Sonoda, President Cre-en Inc.
Initiatives to Create Value

The Mitsubishi Electric Group has taken on the challenge of resolving diversifying social challenges including environmental issues and resource and energy issues through its products, systems and services. In doing so, it promotes initiatives to create values, such as simultaneous achievement of “sustainable society,” and “safety, security, and comfort.” In these ways, the Mitsubishi...
Electric Group pursues the sustainable growth of the entire Group.
Meanwhile, by pursuing sustainable growth of the Group through all its corporate activities including initiatives to create value, the Group will also contribute to achieving the SDGs, common global goals.
CSR Materiality

The Mitsubishi Electric Group regards its corporate social responsibility (CSR) initiatives as the foundation of its corporate management. The Mitsubishi Electric Group identified CSR materiality in order to realize the further integration of CSR with management and the long-term advancement of CSR initiatives. The Group will continue to pursue its initiatives for addressing the four material issues in cooperation with business partners along the supply chain.

Realize a Sustainable Society

Under its Environmental Vision 2021 formulated as a goal for fiscal 2021, the Mitsubishi Electric Group has been carrying out initiatives to realize a low-carbon, recycling-based society that functions in harmony with nature.

The Group has formulated its Environmental Sustainability Vision 2050 to clarify the Group’s stance on addressing long-term environmental issues and creating new value for a sustainable future toward 2050.

Reasons why it is important

Environmental issues including climate change and resource and energy issues are global issues. The Mitsubishi Electric Group will contribute to solving these issues with the aim of realizing a sustainable society.

Main FY2021 targets

Provide products and services that contribute to Goal 7, “Affordable and clean energy,” and Goal 13, “Climate action,” of the SDGs

Reduce CO₂ emissions from product usage

More than 35% reduction compared to FY2001 by FY2021

Reduce CO₂ emissions from production

Less than 1.47 million tons by FY2021 (CO₂ equivalent)

Financial information based on recommendations of the Task Force on Climate-related Financial Disclosures (TCFD)

The Mitsubishi Electric Group has expressed its support for the recommendations of the TCFD (Task Force on Climate-related Financial Disclosures). In line with these recommendations, the Group discloses relevant information on climate change.

Strategy for Climate Change

Overview of risk and opportunity assessment through scenario analysis

Through scenario analysis, we assess the corporate activities of the Group in terms of risks and opportunities.

The assessment is made based on two scenarios: a scenario to keep the increase in the global average temperature to below 2°C above pre-industrial levels (2°C scenario) and a scenario in case the temperature rises nearly 4°C as a result of continuing the conventional global warming countermeasures (4°C scenario).

The period covered by the scenario analysis is up to 2050, and the periods are classified as shown below.

For more information, see Environment.
Provide Safety, Security, and Comfort

Since our inception, the Mitsubishi Electric Group has been contributing to society primarily by offering products and services. We constantly strive to increase customer satisfaction and contribute to social prosperity in all aspects of our business, from the production of high-quality, easy-to-use products to after-purchase support and response to major issues.

Reasons why is it important

Various issues are becoming evident due to urbanization and other reasons. The Mitsubishi Electric Group will provide safety, security, and comfort while contributing to solving issues with a focus on city development.

Main FY2021 targets

1. The results of re-examination of the quality assurance system of Mitsubishi Electric and its subsidiaries

Mitsubishi Electric and its subsidiaries, etc. have been found to have committed misconduct with regard to quality control for certain products and have submitted inadequate applications to the relevant authority regarding product certification. In addition to thoroughly reviewing and reinforcing the creation of a quality culture in the organization and strengthening the quality control system, we will strive to ensure compliance once again and strengthen internal control.

Aug 2, 2019 The Results of the Re-examination of the Quality Assurance System of Mitsubishi Electric and Its Subsidiaries (In Japanese text)

2. About the failure in shipping inspection for certain power semiconductor products of Mitsubishi Electric

During November 2014 to June 2019, Mitsubishi Electric’s Power Device Works shipped certain power semiconductor* products it manufactured without carrying out shipping inspections in accordance with the specification agreed with the customer. This incident was found in the course of the ongoing strengthening of quality control following the efforts described in 1 above made across the entire Group. In addition to thoroughly reviewing and reinforcing the creation of a quality climate in the organization and further strengthening the quality control system, we will strive for quick information sharing.

* A semiconductor device that efficiently controls power by converting electricity from AC to DC or raising or lowering the voltage.

Feb 10, 2020 About the Failure in the Shipping Inspection of Certain Power Semiconductor Products of Mitsubishi Electric (In Japanese text)
Respect Human Rights and Promote the Active Participation of Diverse Human Resources

The Mitsubishi Electric Group respects the human rights of all peoples in countries and regions where it engages in business, based on a conscious awareness of its widespread interaction with people and society. It is also promoting Work Style Reform so that a diverse range of human resources can play an active role.

Reasons why is it important
Human rights and diversity are global issues. As a global company, the Mitsubishi Electric Group will grapple with these issues. Diversity is also crucial for creating innovation, which is the source of the Group’s strength.

Main FY2021 targets

Provide anti-harassment education for all employees
Attendance rate of
100%

Enhancement of a reporting system with respect to human rights violations

Increase the ratio of women among new recruits in engineering fields
FY2022 target of
20% or higher

Initiatives to prevent recurrence of work-related issues

The Mitsubishi Electric Group has experienced work-related issues that affected employees’ lives or mental and physical health. Although the Group implemented prevention measures on each occasion, another work-related issue occurred in fiscal 2020. We took this seriously, deeply regretted that our past initiatives had not been sufficient, and determined preventive measures including new initiatives.

The Group considers the prevention of recurrence of work-related issues as its top management priority, and as a whole, makes every effort to create a work environment where all the employees can maintain mental and physical health and work actively with a sense of security. Specifically, the Group will work together to deploy a variety of measures to innovate the workplace culture, including measures to respond to power harassment and mental health issues, to prevent long working hours and to properly manage working hours.

Jan 10, 2020 Initiatives to Prevent Recurrence of Work-Related Issues (In Japanese text)
Strengthen Corporate Governance and Compliance on a Continuous Basis

To realize sustained growth and increase corporate value, the Mitsubishi Electric Group works to maintain the flexibility of its operations while promoting management transparency. These endeavors are supported by an efficient corporate governance structure that clearly defines and reinforces the supervisory functions of management while ensuring that the company is responsive to the expectations of customers, shareholders, and all of its stakeholders. Additionally, the Mitsubishi Electric Group recognizes that not only ethics and legal compliance, but also compliance in the wider sense of the term that includes the perspective of corporate ethics, are the foundation of the Group’s continued existence.

Reasons why it is important
Corporate governance and compliance are fundamental preconditions for a company’s continued existence. The Mitsubishi Electric Group will continue to strengthen these areas.

Main FY2021 targets

- Maintain a 100% attendance in e-learning programs on compliance
  - Maintain rate of 100%

- Provide proper information to directors at the proper time, conduct a review of the board of directors, and analyze and evaluate the review

- Enhancement comprehensive cybersecurity measures
  1. Technical measures.
  2. Thorough document management.
  3. Framework upgrading

Potential for leaks of personal data and confidential corporate information due to unauthorized system access

We sincerely apologize for any inconvenience and/or concern experienced by our customers and society as a result of the potential data leak incident caused by unauthorized system access, as reported in January 2020.
On June 28, 2019, after detecting and investigating suspicious activity involving computer terminals at Mitsubishi Electric, it was determined that data had been taken through unauthorized system access by a third party. The investigation took some time because it was a sophisticated attack that bypassed monitoring and detection measures, and the logs that would have identified the affected files were deleted by the hacker on some terminals. The finding was that personal data and confidential corporate information may have been leaked externally.

The Mitsubishi Electric Group deeply regrets not being able to prevent such a situation, and reaffirms that cybersecurity is an important management issue as stated in the Cyber Security Management Guidelines of the Ministry of Economy, Trade and Industry of Japan. Going forward, we will deploy stronger and more nimble information security measures globally. The Group has established the Corporate Information Security Division, which is a unified organization under the direct control of the president, in order to continually ascertain and manage risks and prevention measures within the Group. We continue to work on information security measures to prevent any such incident from reoccurring. The Group also shares its knowledge to help society as a whole counter today’s increasingly sophisticated and diversified cyber-attacks.

- Jan 20, 2020 Potential for leaks of personal data and confidential corporate information due to unauthorized system access <first report> (In Japanese text)
- Feb 10, 2020 Potential for leaks of personal data and confidential corporate information due to unauthorized system access <second report> (In Japanese text)
- Feb 12, 2020 Potential for leaks of personal data and confidential corporate information due to unauthorized system access <third report> (In Japanese text)
CSR Management

Management

Principles of CSR

The Mitsubishi Electric Group regards its corporate social responsibility (CSR) initiatives as the foundation of its corporate management, and upholds its Corporate Mission and Seven Guiding Principles as the basic policies of its CSR. Particularly with respect to initiatives related to ethics and legal compliance, Group-wide efforts are made to enforce measures such as enhancing training and strengthening internal controls. Active measures are also taken to ensure and improve quality assurance, environmental preservation activities, philanthropic activities, and communication with stakeholders.

Stakeholders of the Mitsubishi Electric Group

To achieve sustainable growth, the Mitsubishi Electric Group must maintain communication with its various stakeholders. We have a corporate social responsibility to incorporate the expectations, requests, and opinions of each stakeholder into our corporate activities, and to increase our positive effect on society while reducing any negative effects.

To help maintain communication with stakeholders, we have taken the “Four Satisfactions” as a management policy, with the aim of providing satisfaction to all of our stakeholders, including society, customers, shareholders, and employees.

Promotional System for CSR

The policies and planning for the CSR activities of the Mitsubishi Electric Group are decided by a CSR Committee appointed by Mitsubishi Electric’s executive officers. The Committee is composed of the heads of Mitsubishi Electric’s management departments (21 members in charge of environmental, social and governance aspects from divisions such as Corporate Strategic Planning and Corporate Human Resources), and discusses the results of activities performed during the previous fiscal year, decisions on future activity plans, and responses to law amendments, from a perspective that spans the entire Mitsubishi Electric Group. The details of CSR Committee meetings are reported to the senior executives through the Executive Officers’ Meeting and the Audit Committee.

Knowing that CSR activities are directly linked to corporate management, each department responsible for ethics and legal compliance, quality assurance and improvement, environmental conservation and philanthropy activities, and communication with stakeholders implements their own initiatives, based on the CSR policy of the Mitsubishi Electric Group.

In addition to the CSR Committee that is generally held once a year, various activities are also promoted and implemented in communication with the CSR Expert Committee and CSR Business Promotion Committee, which are convened as a forum for sharing and executing the policies and plans established by the CSR Committee.
Main agenda of the CSR Committee (held in April 2020)

- Report on achievements made in the previous fiscal year and activities planned in the current fiscal year
- Responses to the sustainable development goals (SDGs)
- Further enhanced information disclosure that takes into account ESG (environment, social, governance) investment
- Human rights initiatives
- Responses to TCFD

Main Initiatives

Participation in the UN Global Compact

In May 2018, the Mitsubishi Electric Group signed the UN Global Compact (UNGC) aimed at promoting CSR activities based on international norms.

By signing the UNGC, the Group pledges to make continued efforts toward sustainable growth by complying with the ten principles in the four areas of human rights, labor, environment and anti-corruption to the extent that it can influence society. Efforts will be made to enhance the Group’s activities by maintaining close communication with UN organizations and relevant initiatives.

Expression of approval of the TCFD recommendations

The Mitsubishi Electric Group has expressed approval of the recommendations by TCFD (Task Force on Climate-related Financial Disclosures) and has been promoting initiatives and disclosing information according to its recommendations.

Main External Evaluation

CDP

Mitsubishi Electric was selected as the highest rating “A List company” from CDP for “Water Security” for four consecutive years.

SBT

It is recognized that the Mitsubishi Electric Group’s greenhouse gas reduction targets for 2030 are based on scientific grounds to “Holding the increase in the global average temperature to well below 2°C above pre-industrial levels” as stipulated in the Paris Agreement. We have obtained certification from the SBT (Science Based Targets) initiative.

EcoVadis

Mitsubishi Electric has been awarded the top-rank Gold Rating in corporate social responsibility (CSR) by EcoVadis, the global CSR assessment agency. Mitsubishi Electric scored especially highly in the categories of environment and sustainable procurement. The Gold Rating places Mitsubishi Electric among the top 5 percent of all companies assessed by EcoVadis.
CSR Management

CSR Materiality and SDGs Management

CSR Materiality

Considering requests from the Global Reporting Initiative (GRI)*, social trends and the business environment, in fiscal 2016 the Mitsubishi Electric Group identified CSR materiality, initiatives, and targets / Key Performance Indicators (KPI) to fulfill the materiality towards realizing the further integration of CSR with management and the long-term advancement of CSR initiatives.

We will implement activities to continuously improve our performance related to CSR materiality, initiatives, and targets / Key Performance Indicators (KPI) based on the PDCA (Plan-Do-Check-Action) Cycle approach.

* An international body that proposes shared global guidelines for corporate sustainability reporting

The Mitsubishi Electric Group and the SDGs

In 2015, the countries of the United Nations General Assembly adopted the Sustainable Development Goals (SDGs). The Mitsubishi Electric Group views these SDGs as an important agenda, the realization of which society seeks.

Under its corporate mission that “The Mitsubishi Electric Group will continually improve its technologies and services by applying creativity to all aspects of its business. By doing so, we enhance the quality of life in our society” the Group aims to contribute to solving social issues. This policy corresponds to what the globally shared goals of the SDGs aim to achieve.

Through our numerous businesses and the entirety of our corporate activities, including environment, social and governance (ESG)-related activities, the Mitsubishi Electric Group is contributing to meeting the 17 SDGs.

The SDGs (Sustainable Development Goals)

The SDGs are a set of global goals that are to be achieved between 2016 and 2030. They were adopted by the United Nations General Assembly in September 2015 as a successor to the Millennium Development Goals (MDGs) that were formulated in 2001, and are composed of 17 goals and 169 targets for achieving a sustainable world.

Two key principles of the SDGs (Sustainable Development Goals) are that they seek change in developed countries, including Japan, and that they pledge “no one will be left behind” in the implementation of their initiatives. In Japan, the SDGs Promotion Headquarters has been established, chaired by the Prime Minister and composed of all ministers in the Cabinet Office, to formulate implementation guidelines and promote initiatives for the SDGs.
Focus on the SDGs

In fiscal 2019, we decided on goals that we would address on a priority basis to further contribute to the SDGs.

As a result of an internal and external survey to confirm SDGs that they have high expectations for contribution by the Mitsubishi Electric Group which was conducted in the course of developing the goals, it was found that they expect us to contribute more through business activities. We decided to address energy, infrastructure, and the environment on a priority basis to further contribute to the SDGs as these are the areas where all the businesses of the Group are involved in and the Group will further focus on them.

---

**CSR materiality**

- **Realize a sustainable society**
- **Provide safety, security, and comfort.**
- **Respect human rights and promote the active participation of diverse human resources**
- **Strengthen corporate governance and compliance on a continuous basis**

---

**Contribute to the SDGs**

**Contribute through value creation**

Focus on the SDGs

**Contribute through all corporate activities**

---

**Progress of Initiatives to Address the SDGs**

The Mitsubishi Electric Group is conducting measures in a variety of forms to make our employees aware of the background to the adoption of the Sustainable Development Goals (SDGs) and to entrench the individual goals themselves, in order to deepen understanding of the SDGs among each of them. Considering how the Mitsubishi Electric Group could contribute, the Group’s CSR committee, CSR expert commit-

---

**Main initiatives to the present**

- Lecture presentation for executives by Toshio Arima, a board member of Global Compact Network Japan (fiscal 2018)
- Reflecting of SDGs in our business strategy (fiscal 2018, fiscal 2019, fiscal 2020, fiscal 2021)
- Holding lecture presentations regarding the SDGs for research and development divisions (fiscal 2018, fiscal 2020)
- Promoting understanding about the SDGs through internal newsletters (fiscal 2018, fiscal 2019, fiscal 2020, fiscal 2021)
- Education of staff to advance the SDGs during training of CSR personnel (fiscal 2018, fiscal 2019)
- SDGs training (fiscal 2019, fiscal 2020)

---

**Goal 7: Affordable and Clean Energy**

**Goal 11: Sustainable Cities and Communities**

**Goal 13: Climate Action**

By further promoting initiatives to create value for these goals to which we can contribute significantly as a comprehensive electrical and electronics manufacturer, we will make a specific contribution to achieving the SDGs.

In doing this, the Mitsubishi Electric Group will integrate the concept of the SDGs into its management strategy and contribute to the SDGs that we will prioritize through the CSR materiality initiatives of “Realize a Sustainable Society,” and “Provide Safety, Security, and Comfort.”

CSR Management

Initiatives Related to the 17 SDGs

The Mitsubishi Electric Group, as a comprehensive electrical and electronic manufacturer, handles a wide range of technologies, products, and services, ranging from familiar home electronics products to satellites and projects on a national scale. As such, we believe that we can also greatly contribute toward meeting the 17 Sustainable Development Goals (SDGs).

1. **No Poverty**
   - We are working to end poverty by creating employment through the global expansion of our business, and launching initiatives including the establishment of social infrastructure and philanthropic activities.

2. **Zero Hunger**
   - We are contributing to solving food-related issues through measures including the provision of IT support for agriculture via ICT and positioning satellites, improving productivity in foodstuffs factories through FA, and supplying refrigeration and freezing technologies for food.

3. **Good Health and Well-being**
   - We contribute to improving health and well-being through transportation safety support systems that help to cut down traffic accidents, as well as through cutting-edge Air conditioning Systems that contribute to the advancement of treatment.

4. **Quality Education**
   - In addition to providing technological assistance to developing nations and supporting remote education through our communications and IT technologies, we are contributing to fostering the next generation and beyond through activities that contribute to society.

5. **Gender Equality**
   - We are supporting the social empowerment of women through providing ICT services and supplying home appliances, and we are promoting the further advancement of women within the Group.

6. **Clean Water and Sanitation**
   - The Group has technology for treating and purifying water, and supplies technologies and systems whose purpose is to deliver safe water.

7. **Affordable and Clean Energy**
   - We are working to develop technologies and systems that will help produce a smart, energy-conserving, and energy-creating society — technologies, products, and services that we are endeavoring to make widely available.

8. **Decent Work and Economic Growth**
   - Through our FA and AI technologies, we are working to contribute to increased productivity and the provision of desirable working environments throughout the Group.

9. **Industry, Innovation and Infrastructure**
   - The Group supports manufacturing through its factory automation business, and nurtures development in the industrial field through technological innovation.

10. **Reduced Inequalities**
    - In cooperation with our stakeholders, we are contributing to realizing discrimination-free societies that respect human rights.

11. **Sustainable Cities and Communities**
    - We provide safety, security, and comfort to people’s lives through our work in the disaster-prevention and infrastructure-development fields.

12. **Responsible Consumption and Production**
    - We are endeavoring to reduce the volume of resources used in manufacturing and to recycle spent products. Additionally, we are also pushing to reduce the volume of final waste disposed and to be environmentally friendly in our resource procurements.

13. **Climate Action**
    - We are working to identify a total valuation of our CO₂ and other greenhouse gas emissions in order to set our goals for reductions.

14. **Life below Water / Life on Land**
    - We develop and supply observation satellites that deliver information about ocean and forest conditions, and further promote initiatives at our offices aimed at harmonizing their activities with the local environment.

15. **Peace, Justice**
    - Based on laws and international norms, we are working to improve both our supply chains and areas including human rights, labor, the environment, and the prevention of corruption on a global scale.

16. **Partnerships for the Goals**
    - We are contributing to the achievement of the SDGs through partnerships with entities including governments, universities, research institutes, companies, and NGOs, pushing ahead with open innovation and other initiatives.

</table>
Our Philosophy

As a corporate citizen committed to meeting societal needs and expectations, the Mitsubishi Electric Group will make full use of the resources it has at hand to contribute to creating an affluent society in partnership with its employees.

Our Policies

- We shall carry out community-based activities in response to societal needs in the fields of social welfare and global environmental conservation.
- We shall contribute to developing the next generation through activities that support the promotion of science and technology, culture and arts, and sports.

Philanthropic Activity Expenditures

Approx. 1.11 billion yen

* The amount spent by Mitsubishi Electric Corporation (includes philanthropic-related expenses such as internal programs and product donations)

Support for Novel Coronavirus (COVID-19) Measures

Here are some of the main activities supported by the Mitsubishi Electric Group in response to the COVID-19 pandemic. The Group will continue to support activities like these.

- Support for organizations that help prevent the spread of infection and organizations that support medical personnel (90 million yen)
- Donations to organizations that support at-risk children and their families through the SOCIO-ROOTS Fund (approx. 20 million yen)
- Provision of educational support for children by making the content of Science Workshops available free of charge
- Support for medical mask distribution (100,000 masks)
- Production of face guards for workers and donation to neighboring municipal governments (10,000 guards)
- Support for the Hubei Red Cross Society from Mitsubishi Electric (China) Co., Ltd. (1 million yuan)
- Financial support for Italian medical institutions from Mitsubishi Electric Europe B.V. (Total 200,000 Euro)
- Support for local organizations from the Mitsubishi Electric America Foundation (1.3 million dollars)
- Support for healthcare from the Mitsubishi Electric Thai Foundation (2.4 million baht)

*As of July 2020
Social Welfare

Building a Society where Everyone can Enjoy an Active Life

The Mitsubishi Electric Group is undertaking support activities in the social welfare field, striving to help build a society where everyone can enjoy an active life. Envisioning a society where “no one will be left behind”, as advocated by the Sustainable Development Goals, the Group is working to realize an Inclusive Society with disabilities, support for their independent lifestyles, as well as to children who need assistance.

Case Studies

Mitsubishi Electric SOCIO-ROOTS Fund

Mitsubishi Electric supports social welfare by providing financial support to organizations through the Mitsubishi Electric SOCIO-ROOTS Fund, a gift program in which the Corporation matches employee donations. As of March 2020, the fund had made donations to about 2,100 organizations, and had collected a cumulative total of approximately 1.37 billion yen.

Donation to Local Welfare Facilities for People with Disabilities (Fukuyama Works)

The Fukuyama Works matched funds raised by employees and donated the combined amount to two local facilities in Fukuyama City: the Physical Education Center for Persons with Disabilities, and the Support Facility for Persons with Disabilities. In response to these efforts to help build a more inclusive society, the Works received a message from the City, “We thank you for thisheartwarming support based on the goodwill of both employees and the company, and it will substantially benefit our facility users.” By conducting activities like these at sites across Japan, the Group will continue to support local social welfare facilities.

Global Environmental Conservation

Thinking about the Future of the Planet

The Mitsubishi Electric Group promotes employee-led environmental conservation activities, which are carried out in cooperation with government bodies and local communities. It also holds outdoor workshops for children to nurture their love of nature.

Case Studies

Satoyama Woodland Preservation Project

The Mitsubishi Electric Group has conducted the Satoyama Woodland Preservation Project since October 2007, encouraging employees to help restore nature to places such as parks, forests, and rivers around our business locations. The aims are to repay nature for all the bounties it offers and the diversity of life it supports, and to contribute to the communities where the Group’s business sites are located. With the cooperation of NPOs and local governments, employees carry out activities tailored to the situations in their local communities, under the motto “Steady and Sustained.”

Rural Conservation Activities at the Rachihama Disaster Prevention Green Space in Fukushima Prefecture (Tohoku Branch Office / Koriyama Area)

In October 2016, acorns were collected in areas struck by the 2011 Great East Japan Earthquake. After being sprouted and raised by employees in their homes, the saplings were recently planted in the Rachihama Disaster Prevention Green Space, located in Shinchi Town, Soma District, Fukushima Prefecture. The aim is to ensure that the saplings grow big and tall, one day becoming a magnificent coastal disaster prevention forest. Volunteers are being recruited group-wide to continue the regular conservation activities at this location.
Science and Technology

Developing Future Engineers
As part of its efforts to develop the next-generation, Mitsubishi Electric is making efforts to foster future engineers, such as providing science workshops and educational support for children.

Case Study

Mitsubishi Electric Science Workshops
Since 2009, the Mitsubishi Electric Science Workshops have enabled children to experience basic scientific principles related to electricity, heat, sound, light, wind, communications and programming. The workshops convey the joy of science through experiments and observations, show the relationships between the basic scientific principles taught and real products, and help the children realize how the products are useful in society.

Mitsubishi Electric Science Workshop Program Fiscal 2020 Results

Let’s Use Computer Programming to Operate an Elevator! (Inazawa Works)
At Inazawa Works, a plant that develops and manufactures elevators, a workshop was held for elementary school students. A model was used to explain how an elevator works, and the students were able to try their hands at computer programming to control the elevator speed and floor stops. Under the instruction of new employees, the children participated in experiments and quizzes. They were able to have fun while learning basic elevator principles and discovering the joy of customized machine operation through programming.

Culture, Arts and Sports

Looking to realize the Inclusive Society
While helping to raise the profile of sports for people with disabilities, Mitsubishi Electric is striving to help build an inclusive society where everyone respects and appreciates each other.

Case Study

Going Up Campaign Cross-Country Tour
Starting in the autumn of 2016, the Mitsubishi Electric Group has been striving to increase the popularity of sports played by people with disabilities and help realize a more inclusive society. The Going Up Campaign Cross-Country Tour was launched to allow the public to experience parasports as the tour passed through cities across Japan. The tour visited 42 prefectures, and more than 110,000 people participated.

Going Up Campaign for Schools
Since 2018, workshops have been provided to elementary schools in Tokyo, under the Going Up Campaign for Schools initiative, allowing students to experience wheelchair basketball. The workshops are registered as an education support program in Tokyo, and they have been provided to approximately 3,400 students at 39 elementary schools in Tokyo.
