New Graphic Operation Terminals from Mitsubishi Electric Provide “Wider” Choices

Mitsubishi Electric has launched two new Graphic Operation Terminals (GOTs), which come as the latest addition to its GOT2000 Series Wide Model lineup. The 12.1-inch widescreen models, which feature narrow bezels and come in frame colors of smart silver (GT2512-WXTSD) or cool black (GT2512-WXTBD), will help meet customers’ needs for a wider screen to show more information in factory, process, utility and other automation applications.

The new models feature two Ethernet ports, facilitating the connection of Ethernet cables.
These new widescreen GOTs are also ready to support remote connection in cases where user access may be restricted. Remote connection functions such as SoftGOT enable remote maintenance via access to the local GOT screen while operators can gain live data using GOT Mobile.

By using GOT Mobile, operators can monitor the screen from computers and tablets in a remote location.

New Antibacterial, Antiviral Protection Sheets Available as Options for Standard GOTs
In further enhancements to support safe-working practices, there are also new antibacterial, antiviral protection sheets as options for standard GT27 and GT25 GOTs in sizes of 12.1, 10.4 and 8.4 inches. These sheets help reduce disinfection work for virus countermeasures by adopting “SIAA" certified sheets with anti-virus and anti-bacterial features. These sheets, which use RIKEN TECHNOS' RIKEGUARD®, have proven to inactivate 99.99% of viruses and reduce bacterial growth to less than 1/100, with 10+ years of performance in typical environments.
Products with the SIAA marks shown have been evaluated in accordance with ISO 22196 and ISO 21702 standards; this means product quality is controlled and information disclosed under the SIAA guidelines.

Notes on antibacterial and antiviral properties:
1) This product uses RIKEGUARD®, which is registered with SIAA.
2) The SIAA mark is displayed on products that have been evaluated in accordance with ISO 22196 and ISO 21702 standards and for which quality control and information has been disclosed in accordance with the Antimicrobial Product Technology Council guidelines.
   - Inorganic Antibacterial Agent/Kneading/Surface Layer: JP0122310A0004O
   - Inorganic Antiviral Agent/Kneading/Surface Layer: JP0612310A0003R
3) This product uses antibacterial and antiviral materials that meet SIAA safety standards.
4) This product complies with SIAA safety standards.
5) This product is not a medicine. Antiviral processing is not intended to treat or prevent disease.
6) This product does not inhibit the growth of all bacteria. This product does not inactivate all viruses.

About e-F@ctory

e-F@ctory is Mitsubishi Electric’s integrated concept to build reliable and flexible manufacturing systems that enable users to achieve many of their high speed, information driven manufacturing aspirations. Through its partner solution activity, the e-F@ctory Alliance, and its work with open network associations such as The CC-Link Partners Association (CLPA), users can build comprehensive solutions based on a wide ranging “best in class” principle.

In summary, e-F@ctory and the e-F@ctory Alliance enable customers to achieve integrated manufacturing but still retain the ability to choose the most optimal suppliers and solutions.
