Let me tell you my story: Power, precision and speed are the characteristics with which Mitsubishi Electric robots meet the needs of industry, dramatically driving the automation of a factory. The laboratory of Mechatronics Careers at the ITESM Campus León, relies on all these qualities and puts them within the reach of its students, providing state-of-the-art technology and advanced learning. We invite you to visit the campus and get to know the wide academic opportunities it can offer you.

ITESM Campus León – Celda Robotica.
