

Version Update of the General-Purpose Inverter Option FR Configurator2 (Inverter Setup Software)

Thank you for your continued patronage of Mitsubishi Electric drive control products.
The general-purpose inverter option FR Configurator2 (inverter setup software) will be updated.

1. Details of the Version Update

- (1) Addition of supported models
FR-E800-NC will be supported.
- (2) Support of firmware version 18 of the FR-E800
For more information on the version update, refer to Sales and Service No. 823E.
[Sales and Service No.823](#)
- (3) Addition of models compatible with the convert function
The convert function of parameters will be available between the FR-E720EX and the FR-E820.
- (4) End of support for Windows 10
The updated version (1.35M or later) will not support Windows 10.
Use computers with Windows 11.
- (5) Connection via the GOT3000 series
The personal computer (FR Configurator2) and inverter can be connected via the GOT3000 series.
For details on the connection path, refer to the Instruction Manual of the GOT or FR Configurator2.

FR Configurator2 -> (USB cable or Ethernet cable) -> GOT3000 -> (Ethernet cable) -> Inverter
(includes multiple units)

<Connection example>

Date of issue	October 2025	Title	Version Update of the General-Purpose Inverter Option FR Configurator2 (Inverter Setup Software)	Mitsubishi Electric Corp., Nagoya Works 5-1-14 Yada-minami, Higashi-ku, Nagoya 461-8670 Tel.: +81 (52) 721-2111 Main line

2. Product Identification

The SERIAL (determined by date of production) can be checked on the DVD-ROM and the packaging label.

AM 5 Y
Symbol Year Month

SERIAL

The SERIAL consists of two symbols, and two characters indicating the production year and month.

The last digit of the production year is indicated as the Year, and the Month is indicated by 1 to 9, X (October), Y (November), or Z (December).

The SERIAL on the packaging label has additional three characters indicating the control number after the four characters above.
