

---

**Production discontinuation of line insulation monitor**

We would like to inform that we will discontinue the line insulation monitor.

**1. Types**

Line insulation monitor: MEGMO-2

**2. Reason for discontinuation**

Due to discontinuation and unavailability of main materials and parts.

**3. Discontinuation schedules**

Order stop: November 2020

Production stop: December 2020

※Production volume is limited due to the stock of raw materials and parts.

Depending on the production situation, the order stop and the production discontinuation time may change.

**4. Alternative models**

Please refer to the specifications of this model below and use a general commercial product.

Mounting type	Flush
Overall dimension(mm)	W144×H144×D113
Application circuit	Max.460VAC
Control voltage	100VAC
Rated sensitivity resistance	10 to 400 kΩ selectable
Operating time	5 sec. or less
Measurement display	Analog display
Insulated degradation indication LED	Red
External output contact	1C
Alarm resetting method	Auto reset / Manual reset selectable
