

Packaging Label Change for the MM-GKR Series Sensorless Servo Motors

Thank you for your continued patronage of Mitsubishi Electric drive control products. The mark indicated on the packaging label of the MM-GKR series sensorless servo motors will be changed from <G> to <H> to identify the products complying the Directive (EU) 2015/863.

1. Products Affected

MM-GKR series motors

2. Details of Change

Four phthalates (DEHP, DBP, BBP, and DIBP) have been added to the list of six restricted substances of the EU RoHS Directive. Due to this, a <G> mark on the packaging label will be changed to an <H> mark*1 to indicate that the concentrations of all 10 restricted substances in the product do not exceed the maximum permissible values.

The change does not affect the quality, performance, or specifications of the products.

*1 The <H> mark is used only by Mitsubishi Electric and does not assure the product is compliant with EU RoHS Directive.

Example of the mark on the packaging label

Before	After

3. Date of Change

The change will be sequentially applied for products shipped in April 2021 or later.

Both packaging labels may coexist at the distribution stage.
