This document provides precautions on importing and exporting lithium thionyl chloride batteries (hereinafter referred to as "ER batteries") and our CNC products equipped with ER batteries. Please check the following points when importing and exporting ER batteries and our products equipped with ER batteries.

1 PRECAUTIONS

The thionyl chloride contained in ER batteries, which can be used for industrial and commercial products, is subject to export/import regulations in compliance with the "Measures for the Administration on Import and Export License for Dual-use Items and Technologies"*¹ and the "Catalogue of Dual-use Items and Technologies Subject to Import & Export License Administration"*² in China.

Since our CNC products are equipped with ER batteries, please check and comply with the latest Chinese laws and regulations when importing and exporting any model found in Section 2 from and to China.
