65,536-color display function

[Relevant Models] GOT1000 series

Thank you for your continued support of the Mitsubishi Graphic Operation Terminal (GOT).
Displaying of 65,536 colors is now enabled as standard for the GOT1000 (GT15) series.

## 1. GOTs equipped with the 65,536-color display function as standard

For GOTs with the following function version, 65,536-color display is available without the multi-color display board installed.

Model name	Function version	Remark
GT1595-XTBA	B or later	(*1)
GT1595-XTBD	A or later	Equipped from the first version
GT1585V-STBA, GT1585V-STBD	A or later	Equipped from the first version
GT1585-STBA, GT1585-STBD	B or later	(*1)
GT1575V-STBA, GT1575V-STBD	A or later	Equipped from the first version
GT1575-STBA, GT1575-STBD	B or later	(*1)
GT1575-VTBA, GT1575-VTBD	B or later	(*1)
GT1565-VTBA, GT1565-VTBD	B or later	(*1)
GT1555-QTBD	A or later	Equipped from the first version

(*1) For GOTs with the function version A, 65,536-color display is enabled with the multi-color display board **"GT15-XHNB"** installed.

2. Checking the function version of the GOT1000 (GT15) series models equipped with the 65,536-color display function and conventional GOTs
