[Title] Change of the connect cover included with external I/O unit GT15-DIO or GT15-DIOR

[Date of Issue] January 2014

[Relevant Models] The external I/O unit (GT15-DIOR or GT15-DIO) for the GOT1000 and GOT2000 series

Thank you for your continued support of Mitsubishi Graphic Operation Terminal (GOT).

We have changed the cover of the connector for external connection, which is included with the external I/O unit of the GOT1000 and GOT2000 series, associated with the discontinuation of the conventional cover.

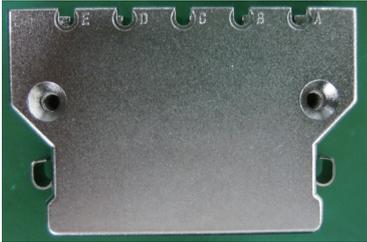

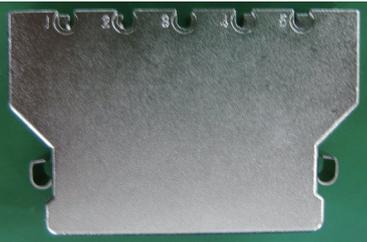

## 1. Target GOT

GT15-DIO, GT15-DIOR

## 2. Difference between the conventional product and the new product

Because the conventional cover of the connector for external connection was discontinued, we have changed it from PCS-E50LA to PCS-E50LPA+R.

Except for some differences of the outside appearance, the functions and the specifications have no difference between the conventional and the new products. The conventional connector cover (PCS-E50LA) is still usable.

	Conventional product (connector cover: PCS-E50LA)	New product (connector cover: PCS-E50LPA+R)
Front		
Back		

## 3. Schedule

These changes have been made sequentially from the August 2013 production.
