[Title] Rating Plate and Packaging Label Changes along with the EAC Certification and CE Directive Amendment

[Date of Issue] February 2016

[Relevant Models] GOT2000 series, GOT1000 series

Thank you for your continued support of Mitsubishi Graphic Operation Terminal (GOT). We have changed the descriptions on the rating plate and the packaging label along with the EAC Certification and the amendment of CE Directives.

These changes do not affect the general specifications, performance specifications, functions, and external dimensions of the GOT.

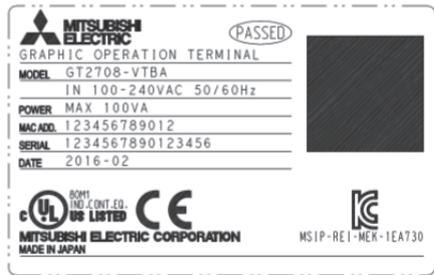

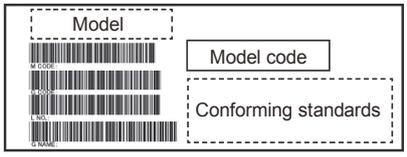

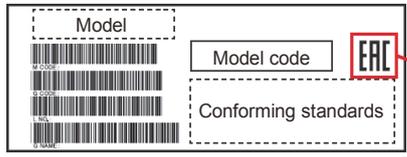

1. Reasons for Change

For the EAC certification and the compliance with the EMC Directive (2014/30/EU) and the Low Voltage Directive (2014/35/EU)

2. Details of Change

The EAC mark is added to the rating plate and the packaging label for the EAC-certified models. In addition, the address of the manufacturer is added to the rating plate, which is mandated by the EMC Directive (2014/30/EU) and the Low Voltage Directive (2014/35/EU).

The following shows examples of the changes. The descriptions and layout differ depending on the model.

Item	Before	After
Rating plate		 <p>EAC mark</p> <p>Address of the manufacturer</p>
Packaging label		 <p>EAC mark</p>

3. Target Model

The target models are as follows.

- GOT1000 series
- GOT2000 series

4. Schedule

These changes have been made sequentially from the February 2016 production.

There may be cases where both the former and new products exist in the distribution stage.
