2. Details of the change

The storage capacity of the user area in the operation memory (RAM) will be changed.
The following shows the difference in the performance specifications before and after the change.

Storage capacity of the user area		Remarks
Before	After	
128 MB	256 MB	The project data used before the change is usable as-is after the change.

3. Supported software and release schedule

By using either of the following software products, project data that uses up to 256 MB of the operation memory (RAM) is usable.

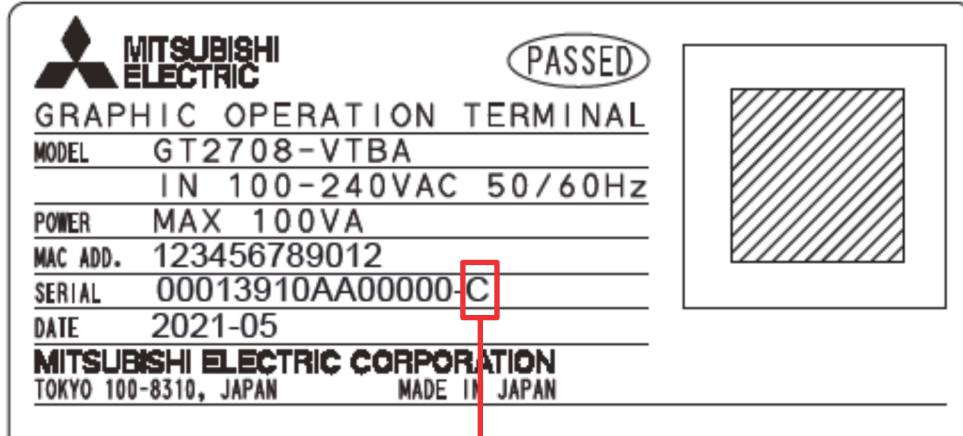

Software	Release schedule	How to obtain the software
HMI/GOT Screen Design Software MELSOFT GT Works3	Apr. 2021	Contact your local sales office.
FA Integrated Engineering Software MELSOFT iQ Works		

[Issue No.] GOT-A-0162

4. How to identify the new products

The new products are the ones with the function version shown in "1. Models affected and schedule" or later.

Check the rating plate of the GOT for its function version.
