

TECHNICAL BULLETIN**[1 / 2]**

[Issue No.] GOT-A-0175-B

[Title] Use of the UKCA Marking due to the Departure of the UK from the EU (for Overseas)

[Date of Issue] July 2021 (Ver. B: June 2026)

[Relevant Models] GOT2000 Series and GOT SIMPLE Series

Thank you for your continued support of Mitsubishi Electric Graphic Operation Terminal (GOT).

Due to the departure of the UK from the EU, products to be distributed/sold in the UK markets are required to bear the UK Conformity Assessed (UKCA) marking.

However, a UK government notice dated August 1, 2023, stated that the use of the CE marking in the UK markets would be permitted indefinitely.

We have been affixing the UKCA marking to our products sequentially from the October 2021 production. For products sold in the future, however, only the CE marking may be displayed where necessary.

This change does not affect the general specifications, performance specifications, functions, and external dimensions of the products.

1. Outline of the UKCA marking

The UKCA marking is a new marking that is required for specific products in the UK (England, Wales, and Scotland) markets.

The UKCA marking covers most products that require the CE marking.

Applicable products must comply with electrical safety (low voltage), EMC, RoHS, and other applicable regulations.

Without complying with the applicable regulations and having the UKCA marking, the products cannot be distributed/sold in the UK markets.*1

As of the issue date of this Technical Bulletin, the regulations and details required for the applicable products are the same as those required for the CE marking.

*1 The UK government notice dated August 1, 2023, stated that the use of the CE marking in the UK markets would be permitted indefinitely.

2. Products affected

GOT2000 series and GOT SIMPLE series

(Except for products without the CE marking, discontinued products, and products to be discontinued)

For details on products without the CE marking, discontinued products, and products to be discontinued, refer to the Mitsubishi Electric FA Global Website.

www.MitsubishiElectric.com/fa

3. Details of the change

The following UKCA marking will be affixed to the products and their packaging labels.

4. Changes to the August 1, 2023 notice

Under the initial transitional measures following the UK's departure from the EU, products bearing the CE marking could be distributed in the UK markets as an alternative to the UKCA marking between January 1, 2021, and December 31, 2024.

In addition, it was planned that, between January 1, 2025, and December 31, 2027, products could be distributed with only the CE marking on the product itself, provided that the UKCA marking was displayed on the packaging.

However, the UK government notice dated August 1, 2023, stated that the use of the CE marking in the UK markets would be permitted indefinitely.

5. Schedule

Compliance with the UKCA marking was completed by December 31, 2022.

For products sold in the future, only the CE marking will be displayed where necessary; as a result, they may be mixed with existing products that display the UKCA marking.

REVISIONS

Version	Print date	Revision
-	July 2021	- First edition
A	March 2022	- Revised the grace period for transition and the schedule.
B	June 2026	- Added the indefinite extension of the CE marking expiration date (issued in August 2023).
