

Changes to the LCD (Display Device), Power Consumption, and Compatible GT Designer3 (GOT2000) Versions for the GT2103-PMBDS for Markets Outside Japan

■Date of Issue

October 2026

■Relevant Models

GOT2000 Series

Thank you for your continued support of Mitsubishi Electric Graphic Operation Terminal (GOT).

This bulletin informs you that the LCD (display device) of the GT2103-PMBDS will be changed, and the hardware version will be updated from D to E.

The following describes the GT Designer3 (GOT2000) versions compatible with hardware version E.

The product's power consumption has changed because of the new LCD.

This change does not affect the general specifications, product specifications, functions, and external dimensions of the products.

However, colors on the LCD and display characteristics may be slightly different.

1 Applicable models and details of the change

GOT		Details	Remarks
Model	Model name		
GT2103	GT2103-PMBDS	LCD change Power consumption change At max. load: 1.9 W or less → 2.2 W or less Main unit (backlight off): 1.3 W or less → 1.6 W or less	Hardware version updated from D to E.

2 GT Designer3 (GOT2000) version

GT Designer3 (GOT2000) versions earlier than 1.325P cannot be used with the updated hardware version E.

Use GT Designer3 (GOT2000) version 1.325P or later.

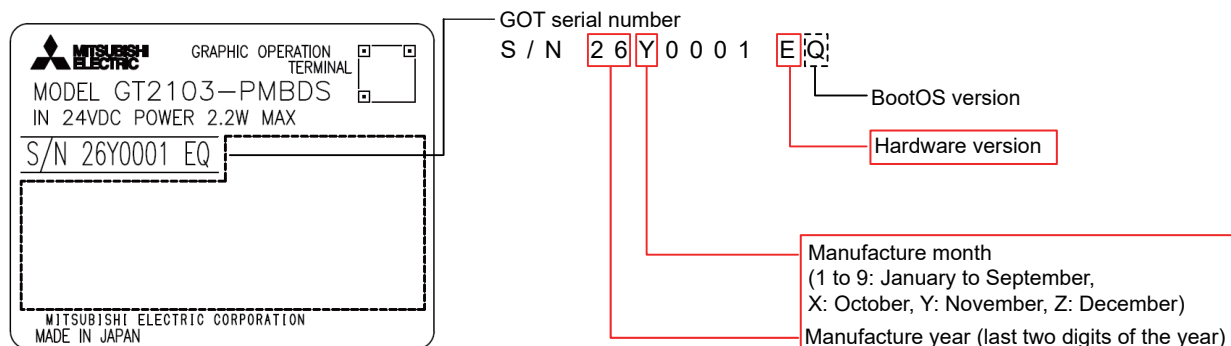

To obtain GT Designer3 (GOT2000), contact your local distributor.

○: Compatible ×: Incompatible

GT Designer3 (GOT2000) version	Hardware version of the applicable models	
	Version D or earlier	Version E or later
Earlier than 1.325P	○	×
1.325P or later	○	○

3 How to check the hardware version

The hardware version and the manufacturing date can be checked on the rating plate located on the rear of the GOT.

4 Schedule

The hardware version of the applicable models will be updated to E from the November 2026 production onward.

There may be cases where both the former and new products exist in the distribution stage.
