2. Power-on procedures

Power on the GOT-A900 Series and Q4ARCPU duplex system with the following procedure:

- 1) Power on GOT-A900 Series
- 2) Power on Q4ARCPU system a few minutes after GOT-A900 Series is powered on.

It is recommended to build an external circuit in advance.

If the above procedures are not observed, group B starts up and controls the Q4ARCPU duplex system instead of group A.

Remarks

When connecting the GOT-A900 Series to the PLC CPU in the system other than Q4ARCPU duplex system via the bus type connection, observe any of the following power-on procedures:

- 1) Simultaneously power on the PLC CPU and GOT-A900 Series.
- 2) Power on the PLC CPU and then GOT-A900 Series.

Powering on GOT-A900 Series makes the PLC CPU run.
