

Precautions on CCC Certification for MI2012-W

■Date of Issue

December 2024

■Relevant Models

MI2012-W

Thank you for your continued support of Mitsubishi Electric industrial PC, MELIPC series.

We will inform you about precautions on the CCC certification when exporting a MELIPC MI2012-W with an AC power cable to China.

1 CCC Certification Compliance Status

The main unit of an MI2012-W is compliant with the CCC certification, but the AC power cable is not.

Therefore, a package containing the AC power cable is not compliant with the CCC certification.

Series	Model	Item	CCC certification	
			Single unit	Package
MELIPC MI2000	MI2012-W	Main unit	Compliant	Not compliant
		AC power cable	Not compliant	

Point

CCC is an abbreviation for China Compulsory Certification.

This is a certification system in China for the purpose of protecting consumers and ensuring safety in China.

It is related to export, distribution, and sale of products to China.

2 When Exporting to China with an AC Power Cable

The AC power cable included with an MI2012-W cannot be exported, distributed, or sold in China.

Separately prepare a CCC-certified AC power cable that satisfies the following specifications.

Item	Specification
Connector shape	IEC 60320-1 C13
Rating	Must be equal to or greater than the voltage and current to be used.
Cable length	Must be a length that allows voltage drop.
