## 2. Installation and update procedures for Windows® 7 incompatible products

This section describes the installation procedures.

### 2.1 Preparation

Detach the USB cable if the personal computer and the FA device are connected with a USB cable.

If a problem occurs when the USB cable is connected after the installation, refer to the sections 3.2, 3.3, and 3.4.

### 2.2 Procedure to install GX Developer

Point					
1.	For iQ Works and GX Works2, the GX Developer installer (setup.exe) is stored in the following folder.				
	Product	S/W version	Medium	Path	Remarks
	iQ Works	Earlier than 1.21X	DVD-ROM	"¥Disk2¥Others"	*1
			CD-ROM	"¥Others" on Disc2	*1
		1.21X or later	DVD-ROM	"¥Disk2¥SUPPORT¥GXD1"	
			CD-ROM	"¥SUPPORT¥GXD1" on Disc2	
	GX Works2	Earlier than 1.53F	CD-ROM	"¥Others"	*1
		1.53F or later	CD-ROM	"¥SUPPORT¥GXD1" on Disc1	
*1: The installer (setup.exe) is a compressed file. The following is the procedure to decompress the file.					
1. Copy the "d8-xxx.dat" file to the HDD on the personal computer. ("xxx" is an alphanumeric string.)					
2. Change the extension of the copied file from "dat" to "exe".					
3. Double-click the "d8-xxx.exe" file and decompress the file.					
4. The "setup.exe" file is stored to the specified folder.					
2. For the product ID required to install GX Developer included in iQ Works or GX Works2, use the product ID of iQ Works or GX Works2.					
For details of how to install GX Developer, refer to GX Developer Version 8 Operating Manual (Startup) (SH-080372E).					

The following is the installation procedure. The same procedure applies to the 32-bit edition and 64-bit edition of Windows® 7.

### 3. Corrective actions for problems

#### 3.1 Corrective action when installation does not complete or warning dialog boxes are displayed

##### (1) Situation

The following warning dialog box may appear on a Windows® 7-compatible personal computer. (Contents of dialog boxes may differ depending on the software used.)

Note: The warning dialog box may be hidden behind the screen of MELSOFT installer.  
Press **Alt** + **Tab** to bring them to front.

##### (2) Occurrence condition

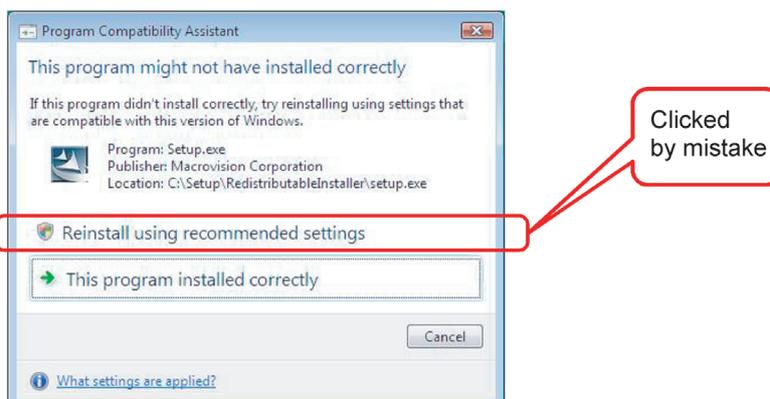

The warning dialog boxes appear when Windows® 7-incompatible driver software is installed on a Windows® 7-compatible personal computer in either of the following conditions.

Occurrence condition 1:

When Windows® 7-incompatible MELSOFT is installed on a Windows® 7-based personal computer.

Occurrence condition 2:

When "Reinstall using recommended settings" is selected on the "Program Compatibility Assistant" screen by mistake after installing MELSOFT.

### (3) Corrective action

Click the **OK** button on each warning dialog box and complete the installation.

Perform either of the following corrective actions corresponding to the occurrence condition.

Corrective action for occurrence condition 1:

By following the procedure described in '2.Installation and update procedures for Windows® 7 incompatible products', install the updated version of Windows® 7-compatible software.

Corrective action for occurrence condition 2:

Reinstall the MELSOFT product.

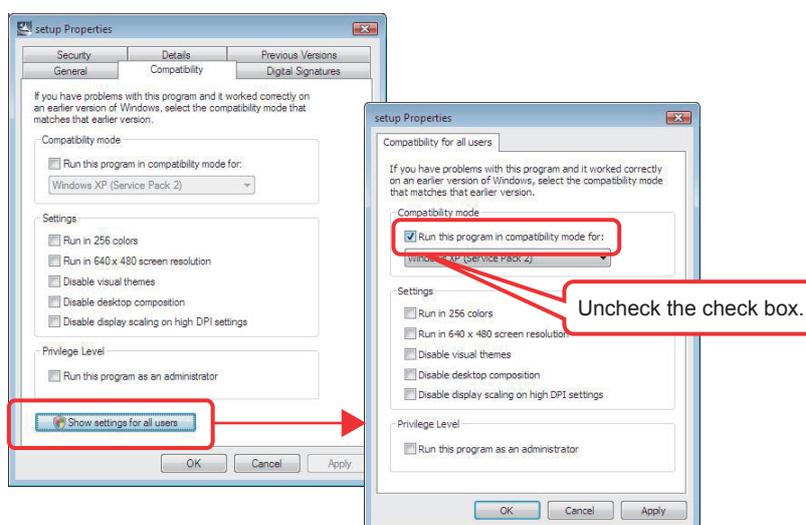

Ensure to select "This program installed correctly" on the "Program Compatibility Assistant" screen.

### Caution!

Note the following instruction when the installer is started from the internal hard disk drive.

If "Reinstall using recommended settings" on the "Program Compatibility Assistant" screen is selected by mistake, 'Windows XP compatibility mode' is set automatically. Disable the 'Windows XP compatibility mode' by the following procedure described below, and perform the reinstallation.

1. Right-click on the setup.exe icon of the installation target in the Windows® explorer, and open the "setup Properties" screen.
2. Select the <<Compatibility>> tab and click the "Show settings for all users" button.
3. Uncheck the "Run this program in compatibility mode for:" check box of compatibility mode in the <<Compatibility for all users>> tab and click the **OK** button.
4. Click the **OK** button on the "setup Properties" screen.

### 3.3. Corrective action when personal computer cannot communicate with programmable controller using USB (Update procedure of USB driver)

#### (1) Situation

A personal computer on which Windows® 7-compatible MELSOFT is installed may not communicate with the programmable controller using USB.

#### (2) Occurrence condition

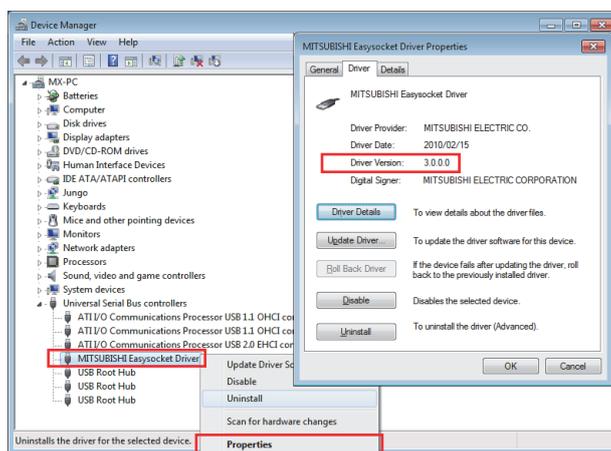

The situation occurs when installing Windows® 7-incompatible MELSOFT and connecting the personal computer to the programmable controller with USB before installing Windows® 7-compatible MELSOFT.

For details of Windows® 7-compatible MELSOFT, refer to the section '1. List of Windows® 7-compatible products and reference for installation procedure'.

#### (3) Checking method

Start the Windows® Device Manager while the personal computer is connected to the programmable controller with USB, right-click "MITSUBISHI Easysocket Driver", and select [Properties]. If "Driver Version" is "3.0.0.0" or earlier on the <<Driver>> tab in the "MITSUBISHI Easysocket Driver Properties" screen, the setting applies to the occurrence condition and a communication failure occurs.

Start the Windows® Device Manager by referring to the instruction from the section 3.2 (3) (b) and after.

### 3.4 Corrective action when personal computer cannot communicate with GOT using USB

#### (1) Situation

A personal computer on which Windows® 7-compatible MELSOFT is installed may not communicate with the GOT using USB.

#### (2) Occurrence condition

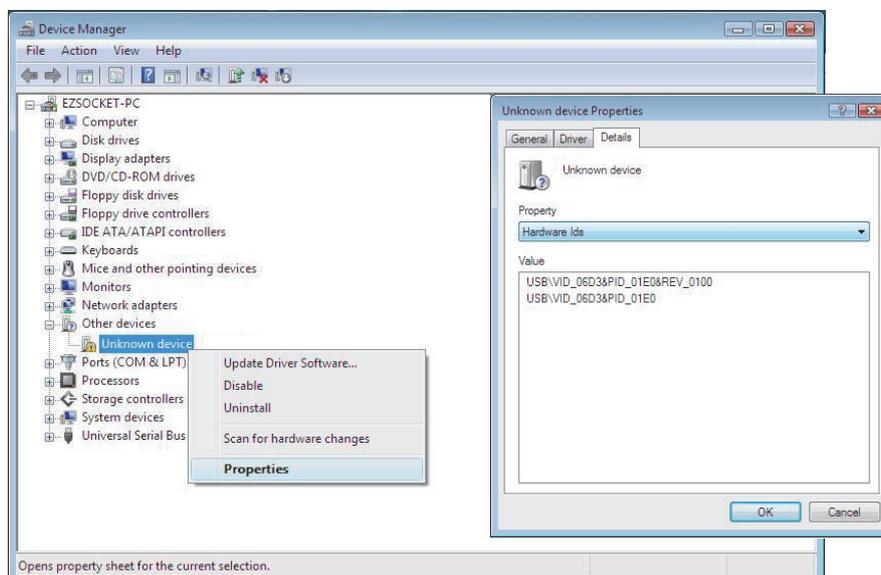

The situation occurs when installing Windows® 7-incompatible MELSOFT and connecting the personal computer to the GOT with USB before installing Windows® 7-compatible MELSOFT.

For details of Windows® 7-compatible MELSOFT, refer to the section '1. List of Windows® 7-compatible products and reference for installation procedure'.

#### (3) Checking method

Reset the power on the GOT and start the Windows® Device Manager while the personal computer is connected to the GOT with USB. If "MITSUBISHI GOT1000 USB Controller" is not displayed under "Universal Serial Bus controllers", but "Unknown device" is displayed under "Other devices", the device needs to be updated.

The "Unknown device", whose "Hardware Ids" is "USB\VID\_06D3&PID\_01E0" on the <<Details>> tab in the "Unknown device Properties" screen, is the update target.

### 3.5 Corrective action when the help screen cannot be displayed

#### (1) Situation

The following "Windows Help and Support" screen may appear and the help screen may not appear on a Windows® 7-compatible personal computer when the help function is started.

#### (2) Occurrence condition

The situation occurs because the software necessary for displaying the help screen is not installed as a standard in Windows® 7.

#### (3) Corrective action

By following the procedure below, download the Windows® Help program for Windows® 7 (WinHlp32.exe) from the Microsoft® support web site, and install it. (Note: The personal computer needs to be connected to the Internet.)

(a) Click "Microsoft Help and Support" on the screen of (1) Situation

(b) The Microsoft Knowledge Base page opens.

<http://support.microsoft.com/kb/917607/en-us>

(This information and above URL are provided as of May, 2010)

Follow the instruction and download the Windows® Help program for Windows® 7 (WinHlp32.exe).

(c) Install the file that has been downloaded.
