

External appearance change for the QA conversion adapter module

■Date of Issue

October 2018

■Relevant Models

QA6ADP

Thank you for your continued support of Mitsubishi Electric programmable controllers, MELSEC-A series and MELSEC-Q series.

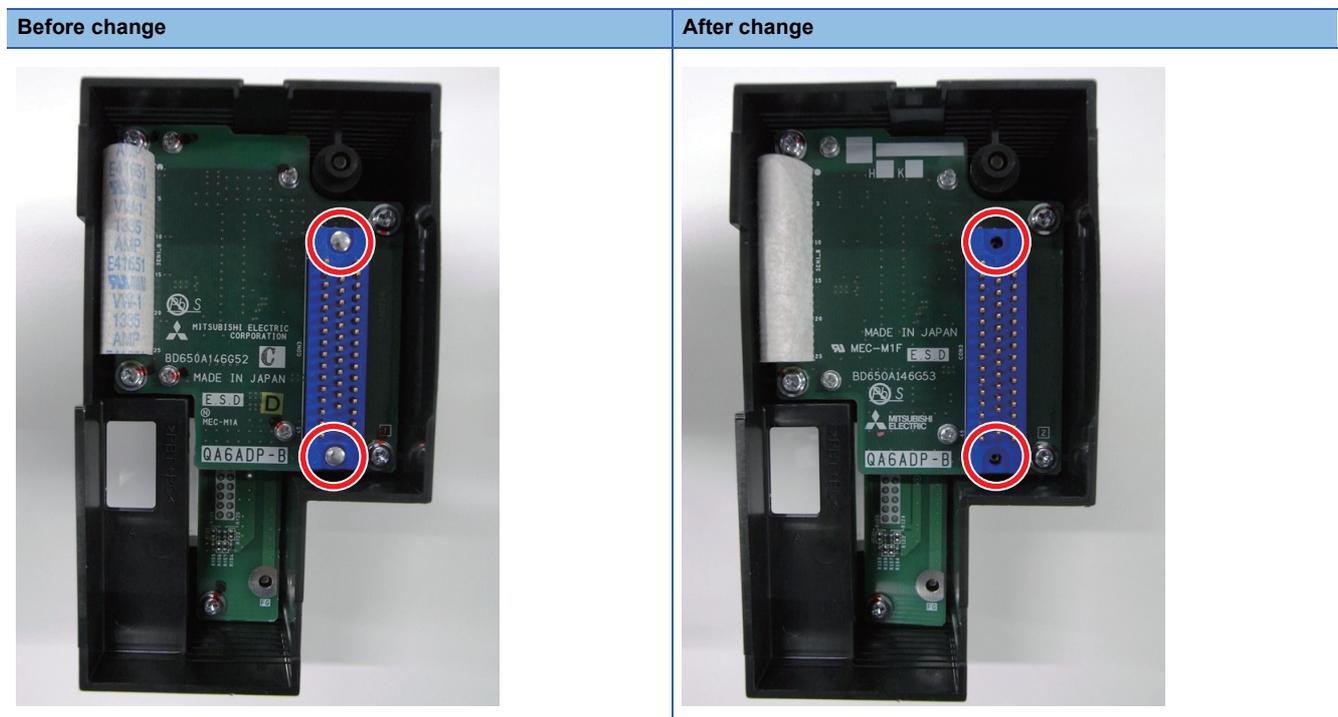

This bulletin announces the external appearance change of the extension base unit mounting connector for the QA conversion adapter module. We appreciate your kind understanding.

There is no impact on the general specifications, performance specifications, and functions of modules due to the change.

1 Details on the change

The external appearance of the extension base unit mounting connector will be changed as shown below according to the change of the mounting method to the board.

The extension base unit mounting connector is fixed at the strength equal to that of the conventional product.

2 Reason for the change

The change is applied to ensure stable procurement of parts and high productivity.

3 Changeover period

The change will take place one by one for products manufactured on and after April 2019.

Depending on the stock situation, the products before change may be delivered even after the changeover period. We appreciate your kind understanding.

4 Relevant model and version after the change

The change will take place from the following version.

Relevant model			Version after the change	How to check the version
Series	Product	Model		
MELSEC-Q series	QA conversion adapter module	QA6ADP	"201114" or later	Serial number (first six digits) in the SERIAL field in the rating plate on the side of the module
