[Title] Transition to RoHS compliant products  
(Communication LSI for CC-Link/LT master station)

[Date of Issue] Nov., '05

[Relevant Models] CL2GA13-60

Thank you for your continued support of Mitsubishi CC-Link/LT dedicated communication LSIs.

We have decided to replace the conventional CC-Link/LT master station dedicated communication LSIs with alternative products that are compliant with the RoHS directive. We will appreciate your understanding on this alternation.

## 1. Relevant models

Product name	Model name	Remarks
Communication LSI for CC-Link/LT master station, CLC13	CL2GA13-60	60 pieces/package

## 2. Schedule

Transition to alternative models is scheduled to start in February 2006.

## 3. Reason for transition

We have been promoting the transition to RoHS compliant products to contribute to environmental conservation. Therefore, it has been decided to replace conventional CC-Link/LT master station dedicated communication LSIs with RoHS compliant models.

## 4. How to differentiate the RoHS compliant products from older models

The RoHS compliant products can be identified by the alphanumeric code engraved on the LSI surface.

- Conventional model:PC02003E
- Alternative model:PC02003E-A

## 5. Precautions for using RoHS compliant products

- (1) The pin-outs and electrical characteristics of the alternative models is identical with the discontinued one. Therefore, there is no need for any modifications.
- (2) When using alternative models, it is recommended to read the reference manual.
