June 2018

Subject: Notification of packing label contents change
Applicable to: All models

1. Models subject to change

All models.

2. Details of the change

- Change the bar code information
- Add QR code to the packing label (excluding option items)

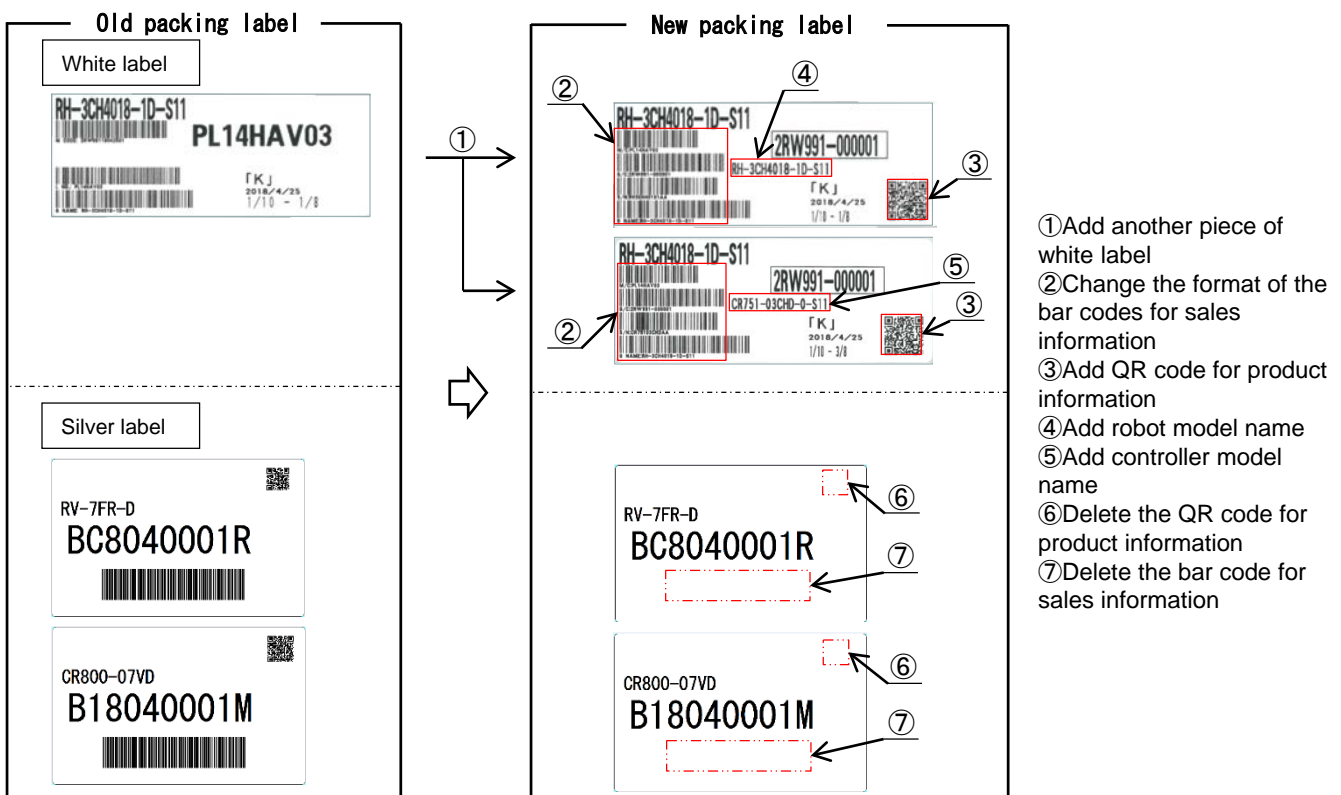

Fig1. Details of the packing label change

3. Reason

Change of the shipment management method.

4. Change schedule

The packing label system is changed after June 25, 2018.

*The silver label of a work in process may be an old type packing label until the end of June because of a system migration term.

However, traceability is secured by managing the white label.

There is a possibility that the silver label is not changed until the end of June due to the items in progress during the system transition term
