

Notice regarding changes to standard accessories included with MELFA ASSISTA Series Controllers

■ Date of issue

October 2026

■ Applicable models

MELFA ASSISTA Series

Thank you for your continued support of the Mitsubishi Electric collaborative robot "MELFA ASSISTA".

Due to the discontinuation of production of the Easy-setup Kit, a controller option for the MELFA ASSISTA Series (Technical News: BFP-A6079-0415E), the EMG / Mode selector box will be included as standard.

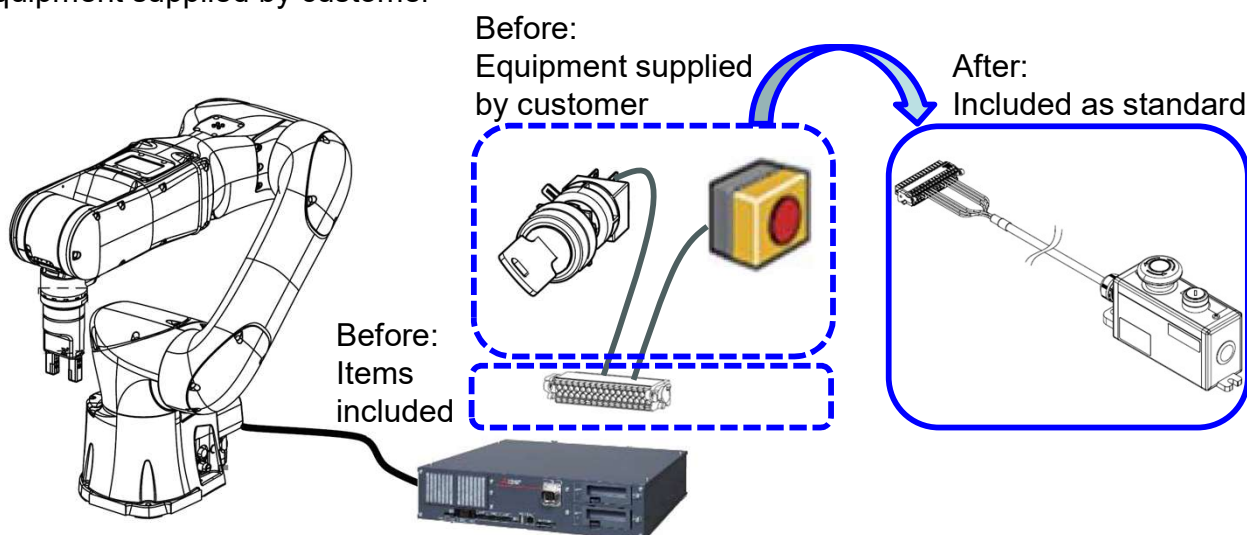

1 Details of the Changes

The EMG / Mode selector box will be included as standard with MELFA ASSISTA Series controllers. With this change, the CNUSR11 connector will be removed from the items included with the robot controller.

The CNUSR11 connector is a component of the EMG / Mode selector box.

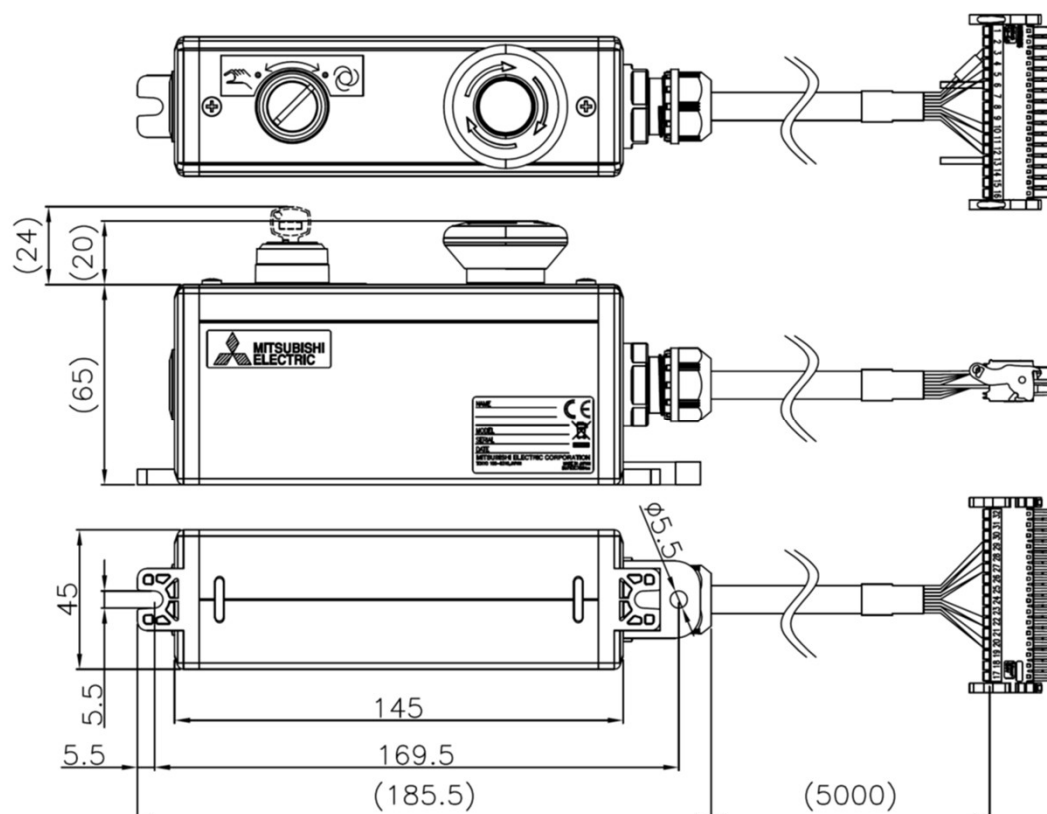

Before	After
CNUSR11 connector	
Mode selector switch/connection cable*1	EMG / Mode selector box (Model : 2F-ASTEMGBOX)
Emergency stop switch/connection cable*1	

*1 Equipment supplied by customer

2. External Dimensions

The external dimensions of the EMG / Mode selector box are shown below.

3. Schedule

Products manufactured from October 2026 onward will include the EMG / Mode selector box as standard.

The relevant instruction manuals and catalogs will be revised sequentially.
