

## Laser Soldering with High-Reliability

### Supporting High Difficulty Soldering like Power-Train System

#### ➤ 130W Laser for high heat capacity PCB

- 130W High-power laser system to support difficult soldering to ground patterns with large heat capacity and keep high quality output in mass.

### Traceability & Visualization of Process Engineering

#### ➤ Visualize temperature : “Soldering Manager”

- “Soldering Manager” records real-time soldering temperature, solder usage, laser output, and soldering videos to support visual process control.

### Laser Soldering : Non-contact, Dirt- and Wear-free

#### ➤ Easy maintenance prevents defects

- Non-contact heating laser reduces consumables and changeover points.
- Reduces maintenance ,which are the cause of defects, and achieves high repeatability.

## Products

Soldering Manager

Laser Unit : ULD-02
