

Linking processes with MELFA robots!

Reference Exhibition

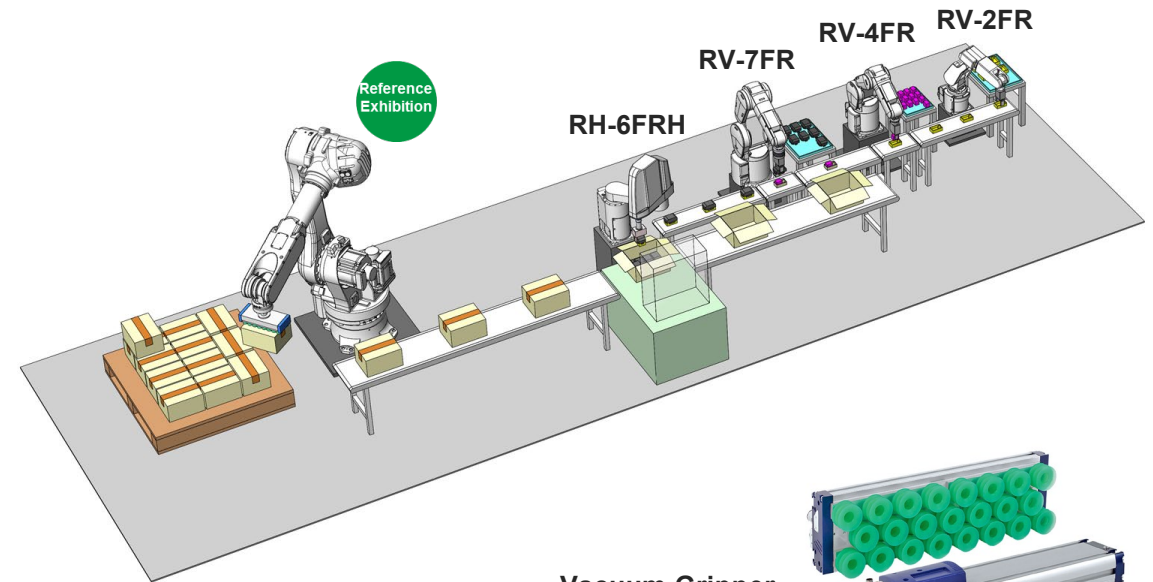

» Features

» Concept

The final palletizing process is achievable because of the robots' reach of up to 2100 mm and transfer capacity of up to 80 kg.

iQ-Platform support enables the entire line to be seamlessly linked and its operation optimized.

Correspond to safety function as FR series. And support fence-less installation and risk assessment .

Vacuum Gripper
Type:FXP-S-SW-442-3 R54-SPB2-40-ED
