

We've achieved quicker delivery times and expanding orders

“ The total running costs, including electricity, have also reduced. ”

Hidefumi Ikawa, CEO, Sagami Yodan.

Fiber Laser Processing Machine with automatic sheet changer brings industry competitiveness

Let me tell you my story: Since 1981, Sagami Yodan Co., Ltd. has provided sheet metal cutting services in Japan. To ensure industry competitiveness, in 2021 we decided to use Mitsubishi Electric's fiber laser processing machine with their automatic sheet changer. To thrive, we must automate everything, and the investment in a new machine is justified by improved productivity and reduced costs. Thank you, Mitsubishi Electric.
