

We reinforced our competitiveness

“ Mitsubishi Electric wire-cut EDMs are high speed machines, and only they can die-cut automotive materials that are thick and hard. ”

Toru Watanabe, CEO, Watanabe.

Aggressive investment generates improved productivity for today's die and mold needs

Let me tell you my story: Watanabe Co., Ltd has actively introduced high-speed electrical discharge machines (EDMs) over the last five years. The new machines are indispensable for our wire cutting die and mold business to keep "...providing the shortest delivery times in Japan." And it's our one hundred EDMs and our fast allocation planning that makes this possible. Thank you, Mitsubishi Electric.
