Partial Withdrawal of ISO9001 Certification for Mitsubishi Electric’s Power Distribution Systems Center

TOKYO, September 22, 2021 – Mitsubishi Electric Corporation (TOKYO: 6503) announced today that certain aspects of the scope of the ISO 9001* certification for the company’s Power Distribution Systems Center (Marugame City, Kagawa Prefecture) have been withdrawn by Lloyd’s Register Quality Assurance Limited, effective September 22. This follows a special assessment conducted in the wake of the temporary suspension of the said certification effective August 23 in connection with the certain quality-related conduct for 72/84kV C-GIS (cubicle-type gas-insulated switchgear) at the Center, as announced on August 17.

Mitsubishi Electric will make every effort to promptly reacquire certification in the area affected.

* An international standard for quality management systems

Notice from Lloyd’s Register Quality Assurance Limited on September 22

1) Withdrawn certification
