Changes for the Better

for a greener tomorrow

INFRARED SENSORS
MeDIR

Infrared
Sensors

Highly precise detection of people and objects using sensor technologies installed in satellites

Applications

Features

1

High pixel count and high temperature-resolution enable highly precise understanding of people/object movement

Mitsubishi Electric Original Pixel Structure

- 1) The supporting legs are ultrathin thanks to the introduction of an innovative microfabrication technique. This makes it possible to transfer energy more efficiently without releasing heat, thereby enabling the pixel count to be increased and achieving higher image resolution.
- 2) The generation of electromagnetic noise is minimized by mounting the thermal diode and high-performance amplifier on the same chip, achieving high temperature-resolution.

2

Vacuum-sealing, Chip-scale Packaging Contributes to Compact Space-saving Size

Vacuum-sealing, Chip-scale technology

- 1) Chip-scale packaging technology developed in-house eliminates the use of ceramic package and achieves vacuum state performance.
- 2) New packaging technology reduces product size to approximately 80% compared to conventional products*, enabling greater compactness and space savings.

*1: Compared to general 16x16 pixel thermopiles available in market.

Specifications

High pixel count

- Tenfold compared to conventional (80 × 32 pixels)

High temp. resolution

- Fivefold compared to conventional (by units of 0.1 °C, 100mK)

Compact & Space-saving

- Reduces product size to 80% compared to conventional (19.5 × 13.5 × 9.5 mm)

	MIR8032 series
Type No.	MIR8032B1★
Pixels	80 × 32
Temp. resolution (NETD)	100 mK (Typ.)
FOV	78° × 29° (Typ.)
Operating voltage	3.3 V
Current consumption	50 mA (Max.)
Product dimensions	19.5 × 13.5 × 9.5 mm
Detectable temp. range	-5 ~ +60 °C
Interface	Serial Peripheral Interface (SPI)

★: New product

■ Sensor Technology Installed in Satellites

Thermal diode sensor technology adopted to install a Compact InfraRed Camera (CIRC) in the ALOS-2†

DAICHI-2 (ALOS-2)

† ALOS-2: Advanced Land Observing Satellite -2, which Mitsubishi Electric delivered to the Japan Aerospace Exploration Agency in 2014 and is now in operation

■ Installed in Kirigamine FZ-Z Series Room Air Conditioners

The newly developed "Move Eye mirA.I+†" is equipped with AI technology and high-resolution sensors.

A world-first*2, the airflow from the air conditioner is detected with high accuracy*3 and adjust to various residential environmental, leading to comfortability

Move eye mirA.I+†

Judgement as warm air reached the floor

Image

*2: Beginning Installation from FZ Series released in November 1, 2019, according to in-house research. *3: Technology to infer airflow and strength based on temperature change at destinations of warm and cool air.

Keep safety first in your circuit designs!

- Mitsubishi Electric Corporation puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage. Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of non-flammable material or (iii) prevention against any malfunction or mishap.

Notes regarding these materials

- These materials are intended as a reference to assist our customers in the selection of the Mitsubishi semiconductor product best suited to the customer's application; they do not convey any intellectual property rights, or any other rights, belonging to Mitsubishi Electric Corporation or a third party.
- Mitsubishi Electric Corporation assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
- All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Mitsubishi Electric Corporation without notice due to product improvements or other reasons. It is therefore recommended that customers contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor for the latest product information before purchasing a product listed herein. The information described here may contain technical inaccuracies or typographical errors. Mitsubishi Electric Corporation assumes no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors. Please also pay attention to information published by Mitsubishi Electric Corporation by various means, including the Mitsubishi Semiconductor home page (<http://www.MitsubishiElectric.com/>).
- When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Mitsubishi Electric Corporation assumes no responsibility for any damage, liability or other loss resulting from the information contained herein.
- Mitsubishi Electric Corporation semiconductors are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.
- The prior written approval of Mitsubishi Electric Corporation is necessary to reprint or reproduce in whole or in part these materials.
- If these products or technologies are subject to the Japanese export control restrictions, they must be exported under a license from the Japanese government and cannot be imported into a country other than the approved destination. Any diversion or reexport contrary to the export control laws and regulations of Japan and/or the country of destination is prohibited.
- Please contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor for further details on these materials or the products contained therein.

for a greener tomorrow

Eco Changes is the Mitsubishi Electric Group's environmental statement, and expresses the Group's stance on environmental management. Through a wide range of businesses, we are helping contribute to the realization of a sustainable society.
