Mitsubishi Electric Establishes Mass-production Technology for Curved Color TFT-LCD Module and Begins Taking Orders

Combination of environmental ruggedness and attractive design ideal for automobiles and leisure boats

TOKYO, November 26, 2018 – Mitsubishi Electric Corporation (TOKYO: 6503) announced today that it has established mass-production technology for a new curved (concave) color TFT-LCD module that combines environmental ruggedness to withstand extreme temperatures and an attractive design, making it ideal for use in automobiles and leisure boats. The module offers a curvature radius from 700mm to less than 1,000mm and optical performance equivalent to that of flat screens. Mitsubishi Electric is now accepting orders for the new module.

The new module will be exhibited at bauma CHINA 2018 in Shanghai, China from November 27 to 30.
Product Features

1) Mass-production technology for TFT-LCD module with curvature radius of 700mm to under 1,000mm
   - Efficient, stable production realized through optimized mechanical design and TFT panel design with
     consideration for curvature tolerance
   - New mass-production technology ensures fast, high quality production with one-stop solution covering
     everything from TFT panel production to bonding of curved cover glass

2) Curved display performance equivalent to that of flat display
   - Optimized mechanical and TFT panel designs achieve white and black luminance uniformity
     equivalent to that of flat displays
   - Excellent visibility, even in bright environments, thanks to super-wide viewing angles of 176 degrees,
     both horizontally and vertically, high brightness of 1,000 cd/m² and high contrast ratio of 1,000:1
   - High-resolution (167-190ppi) display capably handles rich information
   - Vibrant color visibility achieved with enhanced color reproduction (NTSC ration Typ.84%)
   - Unmatched operating temperature range from -40 to 85 degrees Celsius withstands extreme
     temperatures.

Environmental Awareness
The model is mercury-free and fully compliant with the Restriction of the Use of Certain Hazardous
Substances in Electrical and Electronic Equipment (RoHS) directive 2011/65/EU.

About Mitsubishi Electric Corporation
With nearly 100 years of experience in providing reliable, high-quality products, Mitsubishi Electric
Corporation (TOKYO: 6503) is a recognized world leader in the manufacture, marketing and sales of electrical
and electronic equipment used in information processing and communications, space development and satellite
communications, consumer electronics, industrial technology, energy, transportation and building equipment.
Embracing the spirit of its corporate statement, Changes for the Better, and its environmental statement, Eco
Changes, Mitsubishi Electric endeavors to be a global, leading green company, enriching society with
technology. The company recorded consolidated group sales of 4,444.4 billion yen (in accordance with IFRS;
US$ 41.9 billion*) in the fiscal year ended March 31, 2018. For more information visit:
