### **Features of New Buildings**

Mitsubishi Electric expects to improve the quality and efficiency of its production operations by deploying Autonomous Mobile Robots (AMRs) for enhanced automation and logistics efficiency. In addition, strong collaboration between the production facilities will be realized by adopting an Engineering Chain Management (ECM) platform that incorporates 3D data and bill of materials (BOM) information, as well as manufacturing initiatives that make use of IoT technologies for digital transformation. Furthermore, extensive measures to minimize CO<sub>2</sub> emissions will realize next-generation factories that contribute to global decarbonization.
