Mitsubishi Electric Delivers Mobile Air-surveillance Radar System to the Philippines

Japan’s 2nd finished defense equipment and 1st mobile air-surveillance radar system delivered overseas

TOKYO, April 30, 2024 – Mitsubishi Electric Corporation (TOKYO:6503) announced today that it delivered a mobile air-surveillance radar system to the Philippine Air Force in March. The system, ordered by the Department of National Defense of the Republic of the Philippines in August 2020, was designed, manufactured and tested in Japan. This is the second air-surveillance radar system and first mobile unit to be delivered by a Japanese company to a foreign government, following Mitsubishi Electric’s delivery of a fixed radar system to the Philippine Air Force in October 2023.

The mobile system is expected to strengthen the Philippines’ air-surveillance capabilities.

Mitsubishi Electric is working diligently to complete the order for the remaining units and thereby contribute to Japan's security as well as collaborative efforts with other countries to develop defense equipment and technologies in accordance with the Japanese government’s defense policy.
